

CONTENT CAPABILITY PRESENTATION

EDUCATE
ENABLE
EMPOWER

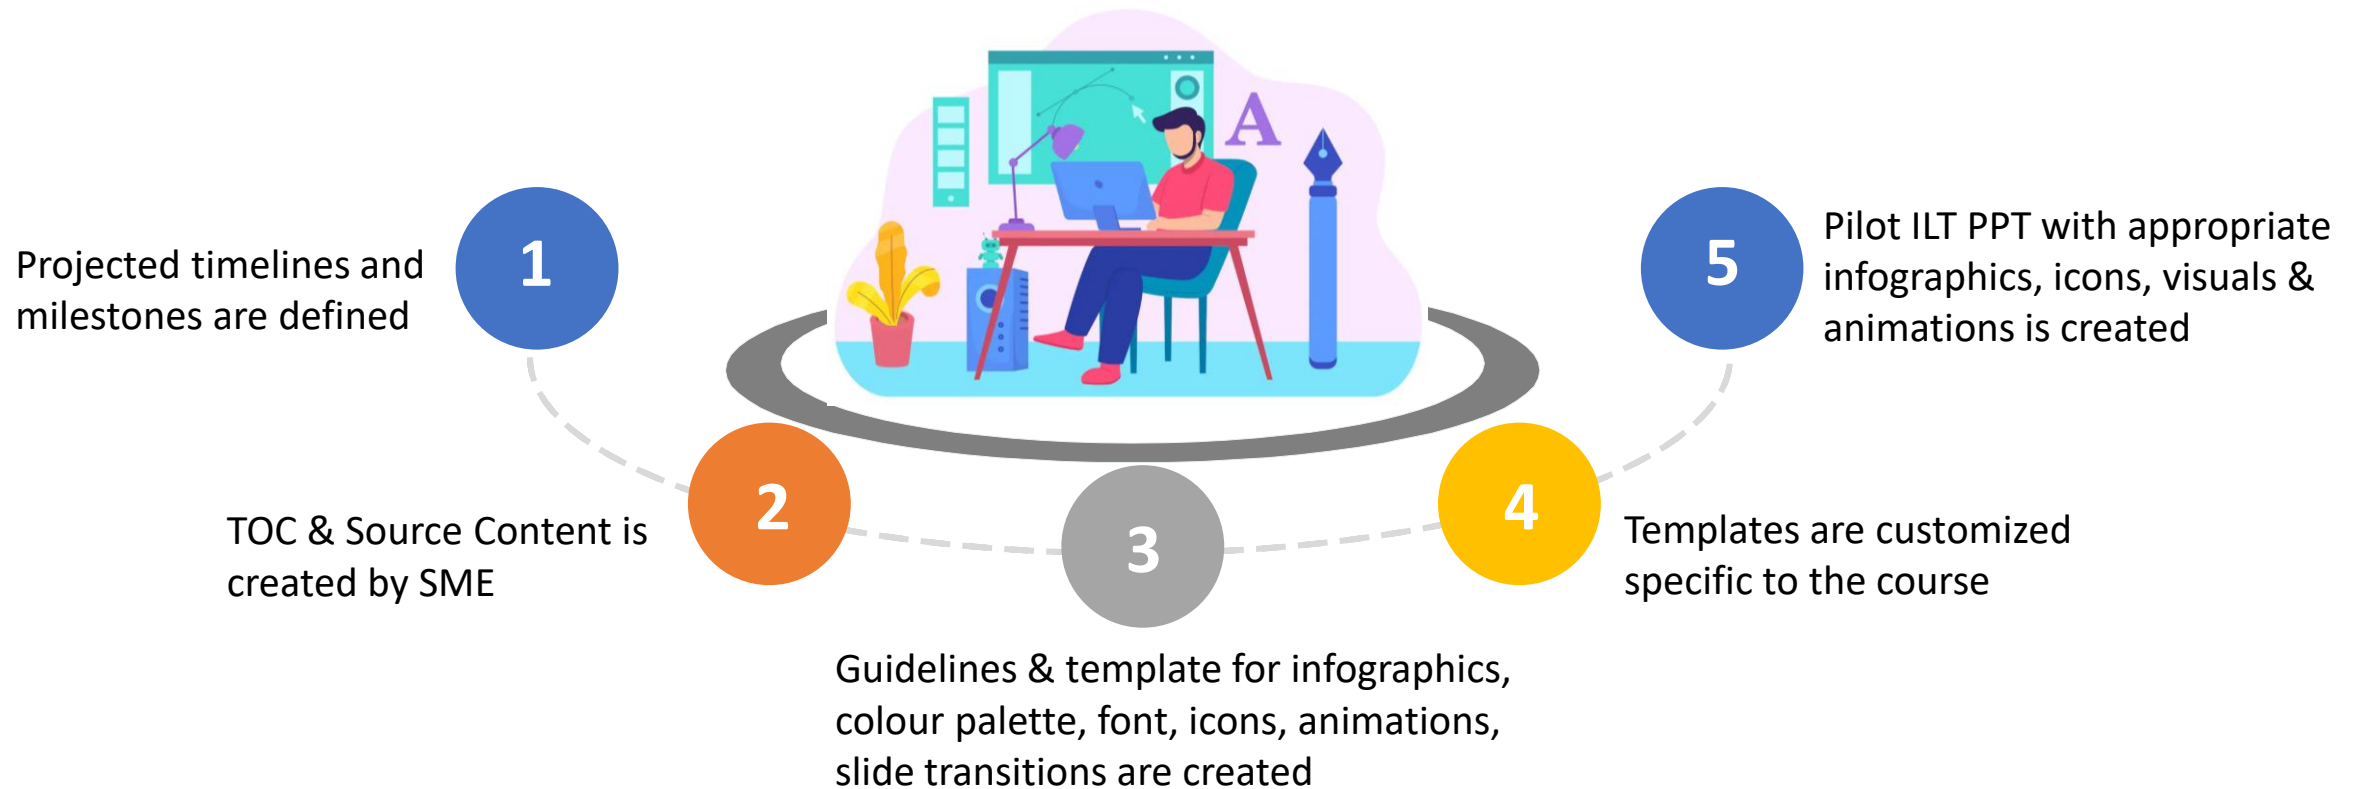

- 1 Part of Manipal, UNext is the first ed-tech company to prioritize a 360-degree talent transformation over upskilling.
- 2 We are the go-to-shop for emerging technologies and evolving trends.
- 3 We help your talent pool look at these as opportunities and transform them to becoming invaluable assets.
- 4 Our programs, content, pedagogy, learner community, platforms and tools are all designed to align to this mission.
- 5 UNext is the only talent transformation partner you will need to futureproof your business and your teams.

SAMPLE ILT SLIDE – Level 1

Recap

- 1 Hypothesis Testing is a statistical technique used to make decisions based on data
- 2 It relies on calculation of the random chance probability of seeing an observed outcome (sample based mean) to test a hypothesis
- 3 Essential steps of hypothesis testing:
 - Set up null and alternate hypothesis
 - Decide on a significance level
 - Calculate p-value
 - Compare to significance level
 - Reject null if p-value is less than significance level

SAMPLE **ILT SLIDE – Level 1**

Central Limit Theorem

Applied in hypothesis testing to aid in calculating probability or chance

Example:

There is a population of 10,000 respondents to a survey, and we pick a sample of 500. We review data on one of the attributes, income.

How many samples are possible?

What will be the mean income of the different samples?

What if we plot a frequency distribution of the sample means in Excel?

SAMPLE ILT SLIDE – Level 1

Distance Measures

Another way to think about the test is to look at distance from mean

Critical Value:

Distance from mean, beyond which the null will be rejected

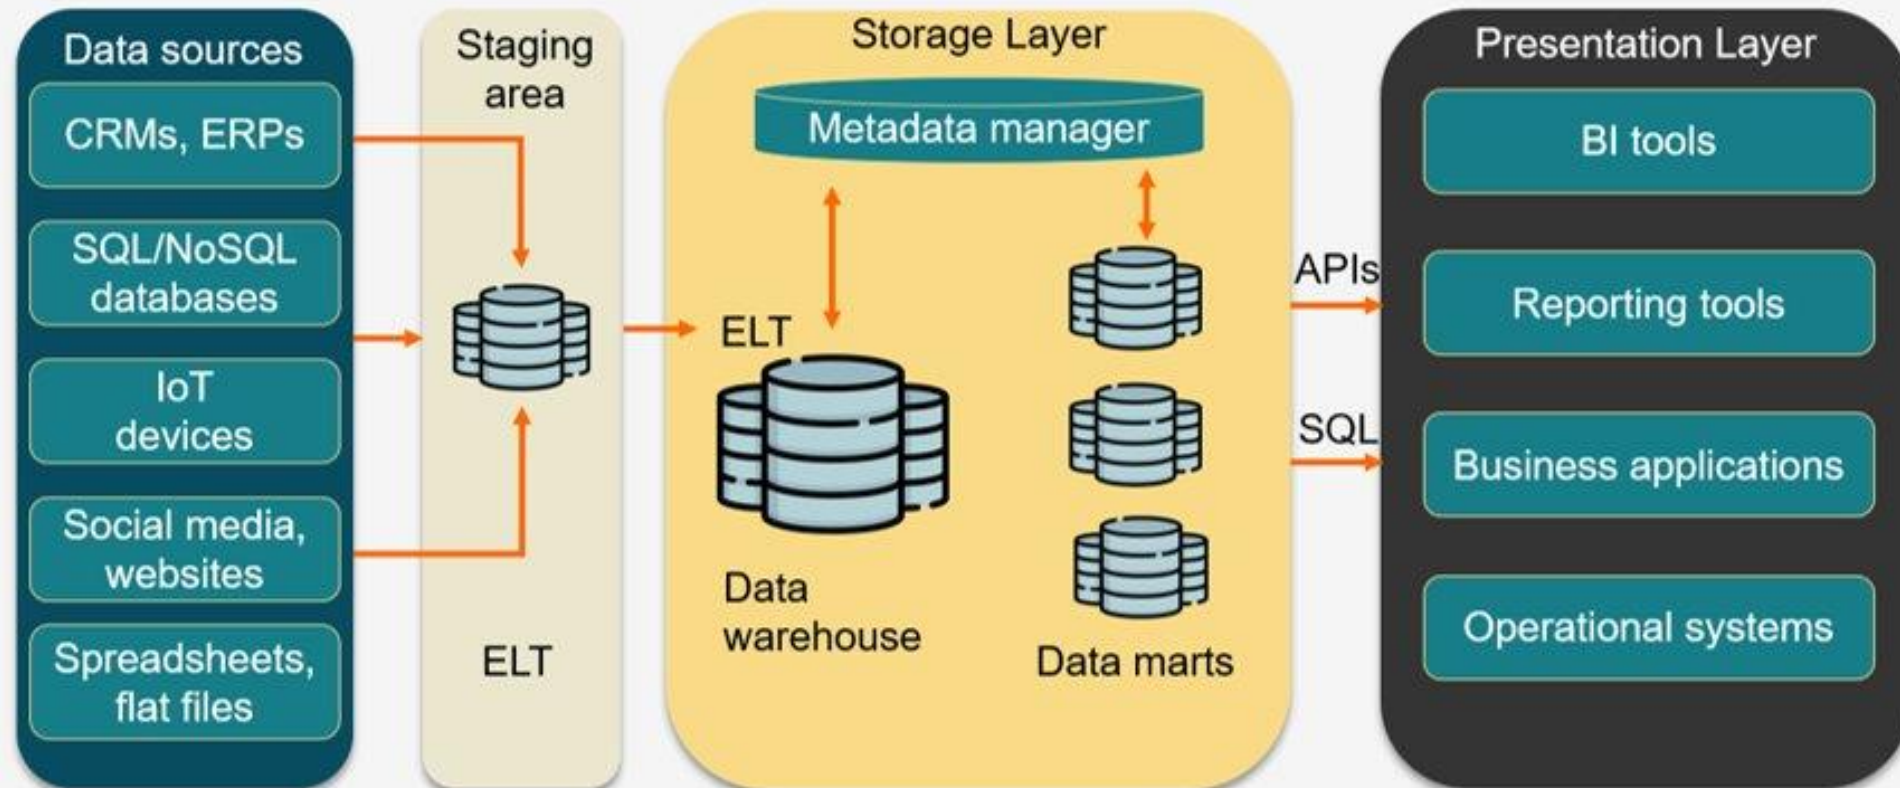

Rejection Region:

Values of the test statistic (distance) that are unlikely if null is true, associated with the probability distribution

Components of Data Warehouse Architecture

There are a lot of instruments used to set up an enterprise data warehousing platform

Integers and Floats

Integers or ints:

Positive or negative whole numbers with no decimal point

Floats:

Real numbers with a decimal point dividing the integer and fractional parts

An example in the Jupyter Notebook

Example-
a = 2
b = 4.0

```
>>>print (type(a))  
<class 'int'>  
>>>print (type(b))  
<class 'float'>
```

Summary

The key take aways from this lesson are:

A Lambda Expression is an anonymous function that can be used to create delegates or expression tree types.

Lambda Expressions are available from C# [3.0](#) and these provide an alternative way of writing anonymous functions.

LEVELS OF ILT PPT

E-Learning Type	Description	No of Slides	Duration
ILT	Level 1- Elementary Basic design layout & composition with restricted color palette, static text, images/icons with simple infographics to support the content.	12-15	1 hour
	Level 2- Intermediate Middle level design layout & composition with minimal range of colors & basic blend of gradients, static text, images, icons, diagrams, flow charts, infographics supporting the content. Annotations and animations specific to the content requirement included with limited animation.	10-12	1 hour

*In case of ILT PPT, a facilitator takes approximately 5 minutes per slide to explain each slide

*The turnaround time has been calculated based on the standard development benchmarks of the corresponding levels.

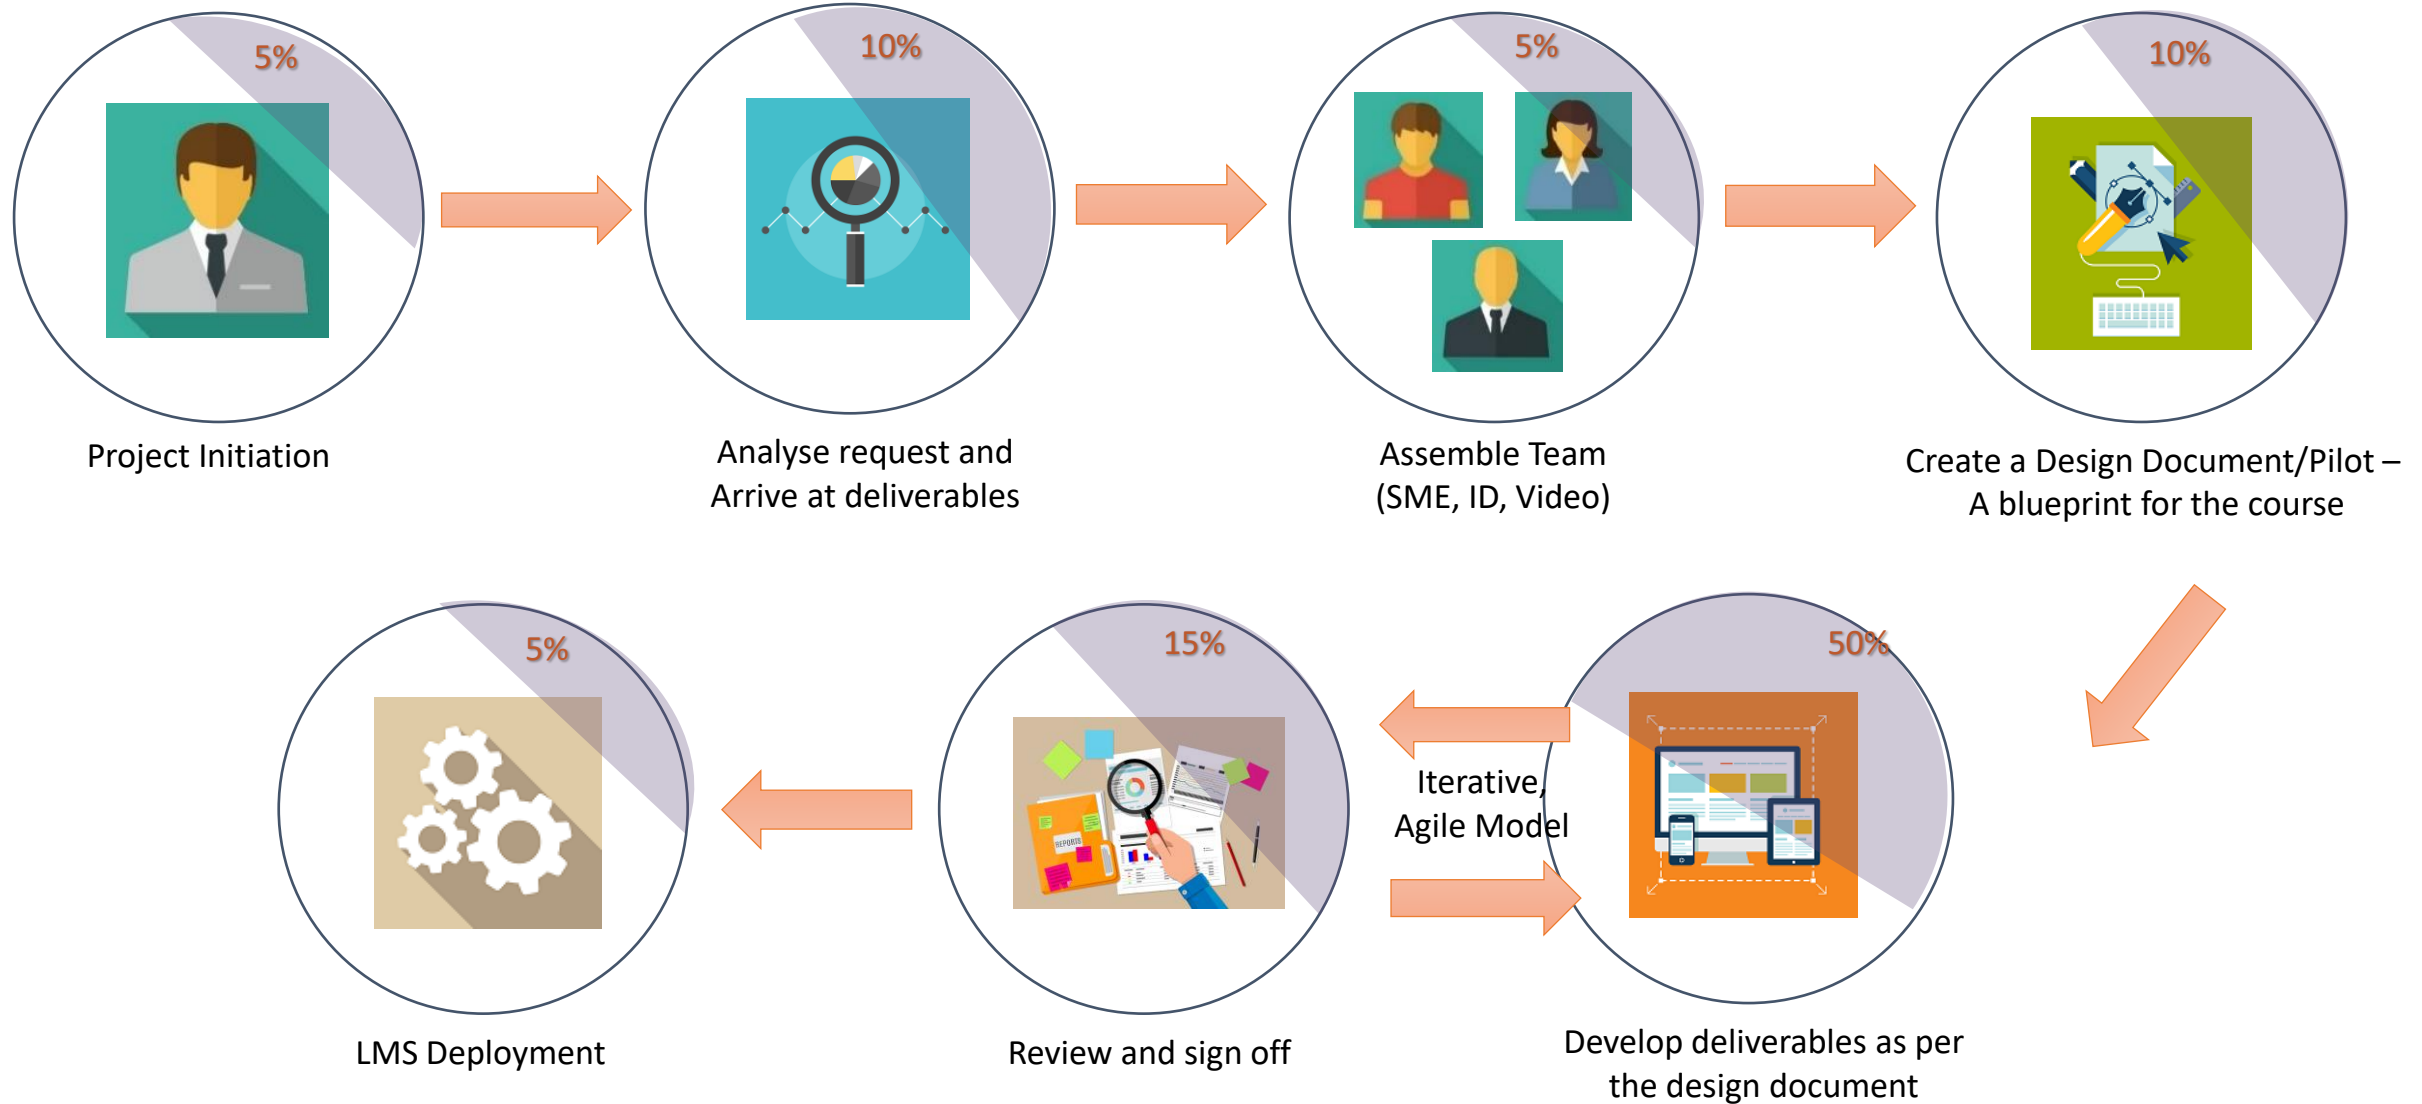

*In-detailed customization of content may result in change of the turn around timelines.

LEVELS OF E-TUTORIALS/SCORM AND AUTHORIZING TOOLS

Levels	Description	Authoring Tools
L1	<p>This level primarily includes self-paced e-learning videos with static text infographic and images/icons with limited animation and voice over (if required).</p> <p>Interactivity - No interactivity, the learner views the e-tutorials</p>	<ul style="list-style-type: none"> ✓ PPT ✓ Adobe After effects ✓ Adobe Premier Pro
L2	<p>This level includes self-paced e-learning videos accompanied by elementary text infographics, High Definition images/icons, animations, few simple transitions and voice over.</p> <p>Interactivity - No interactivity, the learner views the e-tutorials</p>	<ul style="list-style-type: none"> ✓ PPT ✓ Adobe Illustrator ✓ Adobe Photoshop ✓ Adobe Animate CC ✓ Adobe After effects ✓ Adobe Premier Pro ✓ Adobe Audition
L3	<p>This level comprises of intermediate level text infographics, images/icons, graphics, animations along with sophisticated voice over, video (SME inclusion) used to explain learners more complex topics/skills.</p> <p>For SCORM - Interactivity - Click to reveal, drag and drop, multiple choice questions with feedback (TAT -14 to 16 working days)</p>	<ul style="list-style-type: none"> ✓ PPT ✓ Adobe Illustrator ✓ Adobe Photoshop ✓ Adobe Animate CC ✓ Adobe After effects ✓ Adobe Premier Pro ✓ Adobe Audition ✓ Articulate 360 ✓ RISE 360
L4	<p>Category 1 – Without Studio Shoot</p> <p>This level uses the components in levels 1, 2, and 3. These courses are more immersive than other levels of e-learning comprising of advanced and complex infographics, graphics, illustrations (Technical diagrams, complex 2D & 3D objects), stock videos, animation, transitions and music, SFX & voice over modulation.</p> <p>For SCORM Interactivity- Gamification/Simulation, scenario-based case studies (TAT -18 to 22 working days)</p>	<ul style="list-style-type: none"> ✓ PPT ✓ Adobe Illustrator ✓ Adobe Photoshop ✓ Adobe Animate CC ✓ Adobe After effects ✓ Adobe Premier Pro ✓ Adobe Audition ✓ Articulate 360 ✓ RISE 360
	<p>Category 2- With Studio Shoot</p> <p>Studio shoot with complex design components and multimedia (including the elements stated above for L4)</p> <p>For SCORM Interactivity- Gamification/Simulation, scenario-based case studies (TAT -18 to 22 working days)</p>	<ul style="list-style-type: none"> ✓ Digital Video Camera ✓ PTZ camera ✓ Audio microphones ✓ Audio mixer ✓ Video Console ✓ Panel lights with controls ✓ Teleprompter ✓ Rotolights ✓ Interactive panel board ✓ Other shoot equipment <p style="text-align: center;">+</p> <p style="text-align: center; border: 1px solid black; padding: 2px;">Category 1 Software</p>

Human
Resources

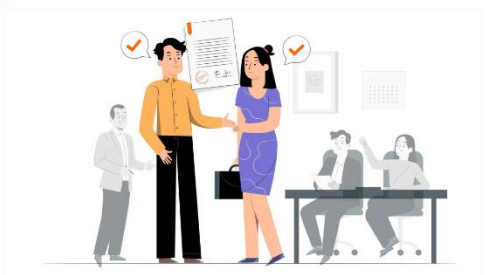

PoSH WFH

Does the Work from Home or the hybrid model of work come under the PoSH Act?

Let us figure out.

How to File a Complaint with the IC?

Before initiating an enquiry, Jane may request the Internal Committee to take steps to settle the matter between her and the respondent through conciliation and in case a settlement is arrived, the same will be forwarded to the management and copies of the said settlement will be given to both Jane and Peter.

ARTIFICIAL INTELLIGENCE @ UNEXT

Play the Video

UNext uses digital avatars of our SMEs to create seamless videos using AI and machine learning.

These avatars look and sound incredibly real and can be used to create large number of videos in factory mode with lesser TAT

OUR PROGRAMS

We offer programs
across
Employee Lifecycle

INFORMATION TECHNOLOGY, DATA SCIENCE AND MANAGEMENT

- Architect Leadership Program
- Product Management Practitioner Program
- Cyber Security Practitioner Program

- Deep Learning
- Natural Language Processing
- Other bespoke Analytics programs

- Strategic Leadership
- Transformational Leadership

- Full Stack
- Cyber Defense & Risk Management
- Business Analyst
- Work Integrated Learning Program in Cyber Sec
- Automation Testing

- Work Integrated Learning Program (M.Tech. in DS and AI)
- Data Engineering (Big Data)
- Data Science (Python, Machine Learning)

- Women Leadership Program
- Certificate of Global Business Leadership
- MBA
- Design Thinking

- Full Stack
- Automation Testing
- Bootcamp Program
- Cyber Security Bootcamp
- Pre-Joining Program

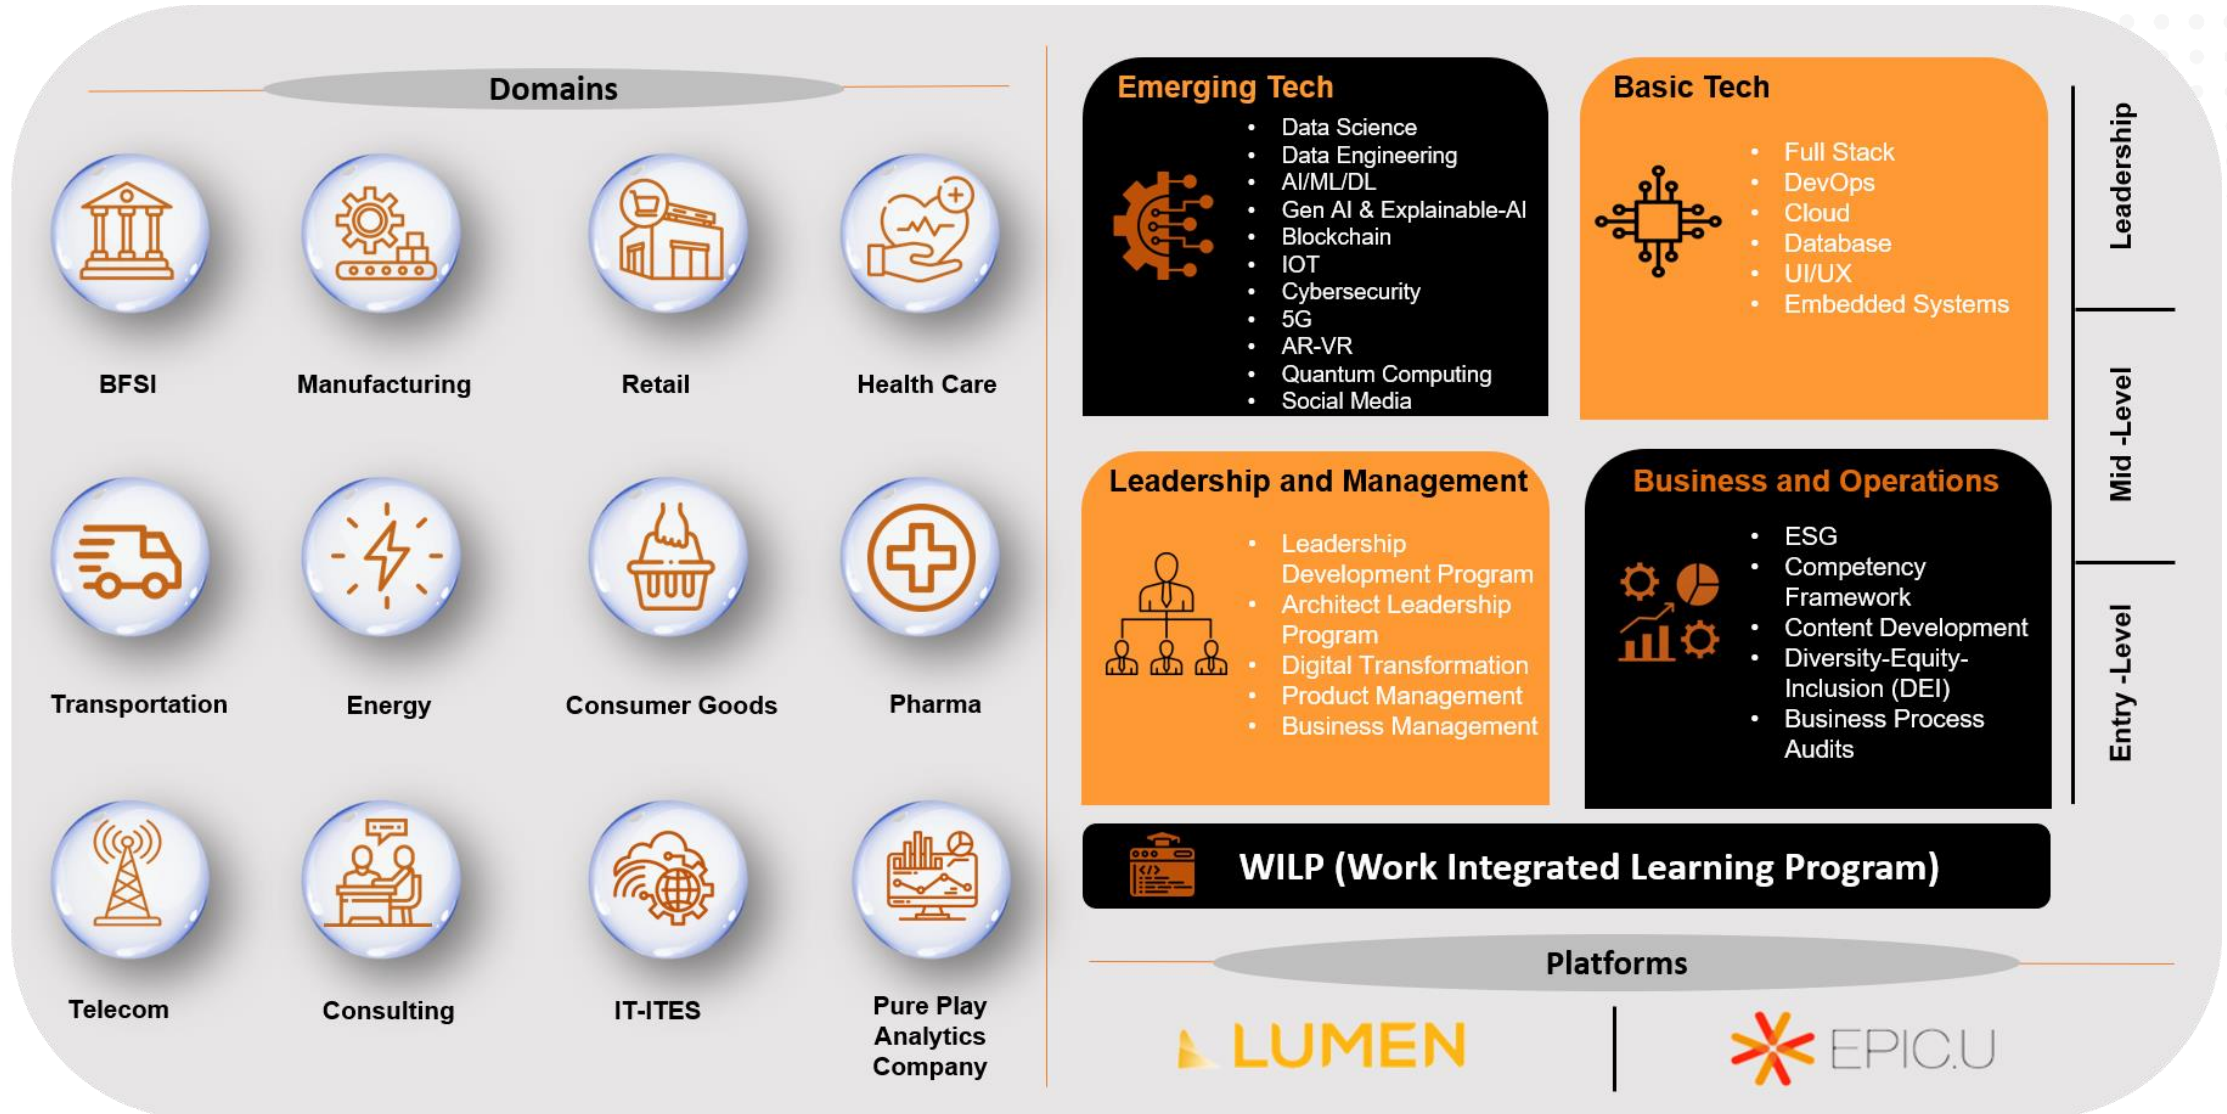

- Advanced Excel
- Visualization Tools (Tableau, Power BI)
- Business Analytics with R/Python

- First Time Managers Program
- Human Error Avoidance Program
- Emerging Women Leaders Program

We Offer Transformation Programs Across Diverse Verticals

Training Need **Analysis**

We provide customized training programs, based on the role and responsibilities, that the trainees are supposed to undertake at the end of the training programs.

OUR **APPROACH**

Smooth flow of content

Content is developed in smaller chunks

Use of contemporary instructional designing elements

Implementation of appropriate graphic designing elements

Learner's ease of understanding

Ensure microlearning

Retain knowledge

Enhance visualization and design aesthetics

DESIGN STRATEGY

We follow a combined approach of **ADDIE's model** and **Gagne's Nine Events of Instruction design** to create a better learning experience for our end users.

Mapping of TOC with E-Learning Content

Defining the Instructional Design strategies & authoring tools specific to course

Setting up Guidelines, Style Guides, Colour Palette, Templates for standardisation

Designing of interactive assessments tools & techniques

Developing of Pilot E-Learning Content

Duration of E-Learning tutorial content is fixed between 8 to 10 mins

Average Number of Slides for ILT PPTs is between 30 to 40 slides

LEARNING THROUGH GAMIFICATION

We use several methods of gamification techniques:

- ☐ Divide the assessments into smaller parts
- ☐ Place the assessments at the end of each unit to ensure that the end user does the self-assessment of his understanding immediately after the unit ends.

The gamification elements such as:

- ☐ Points,
- ☐ Levels,
- ☐ Rewards,
- ☐ Timers

are used to facilitate effective knowledge transfer and effectively retain the knowledge and instill a sense of achievement for the end learner.

THANK YOU
