Employee Need –Solution Life Cycle

Pre-Joining Program

Remote Pre-Joining Program (PJP) delivered online through self paced e-learning and webinars

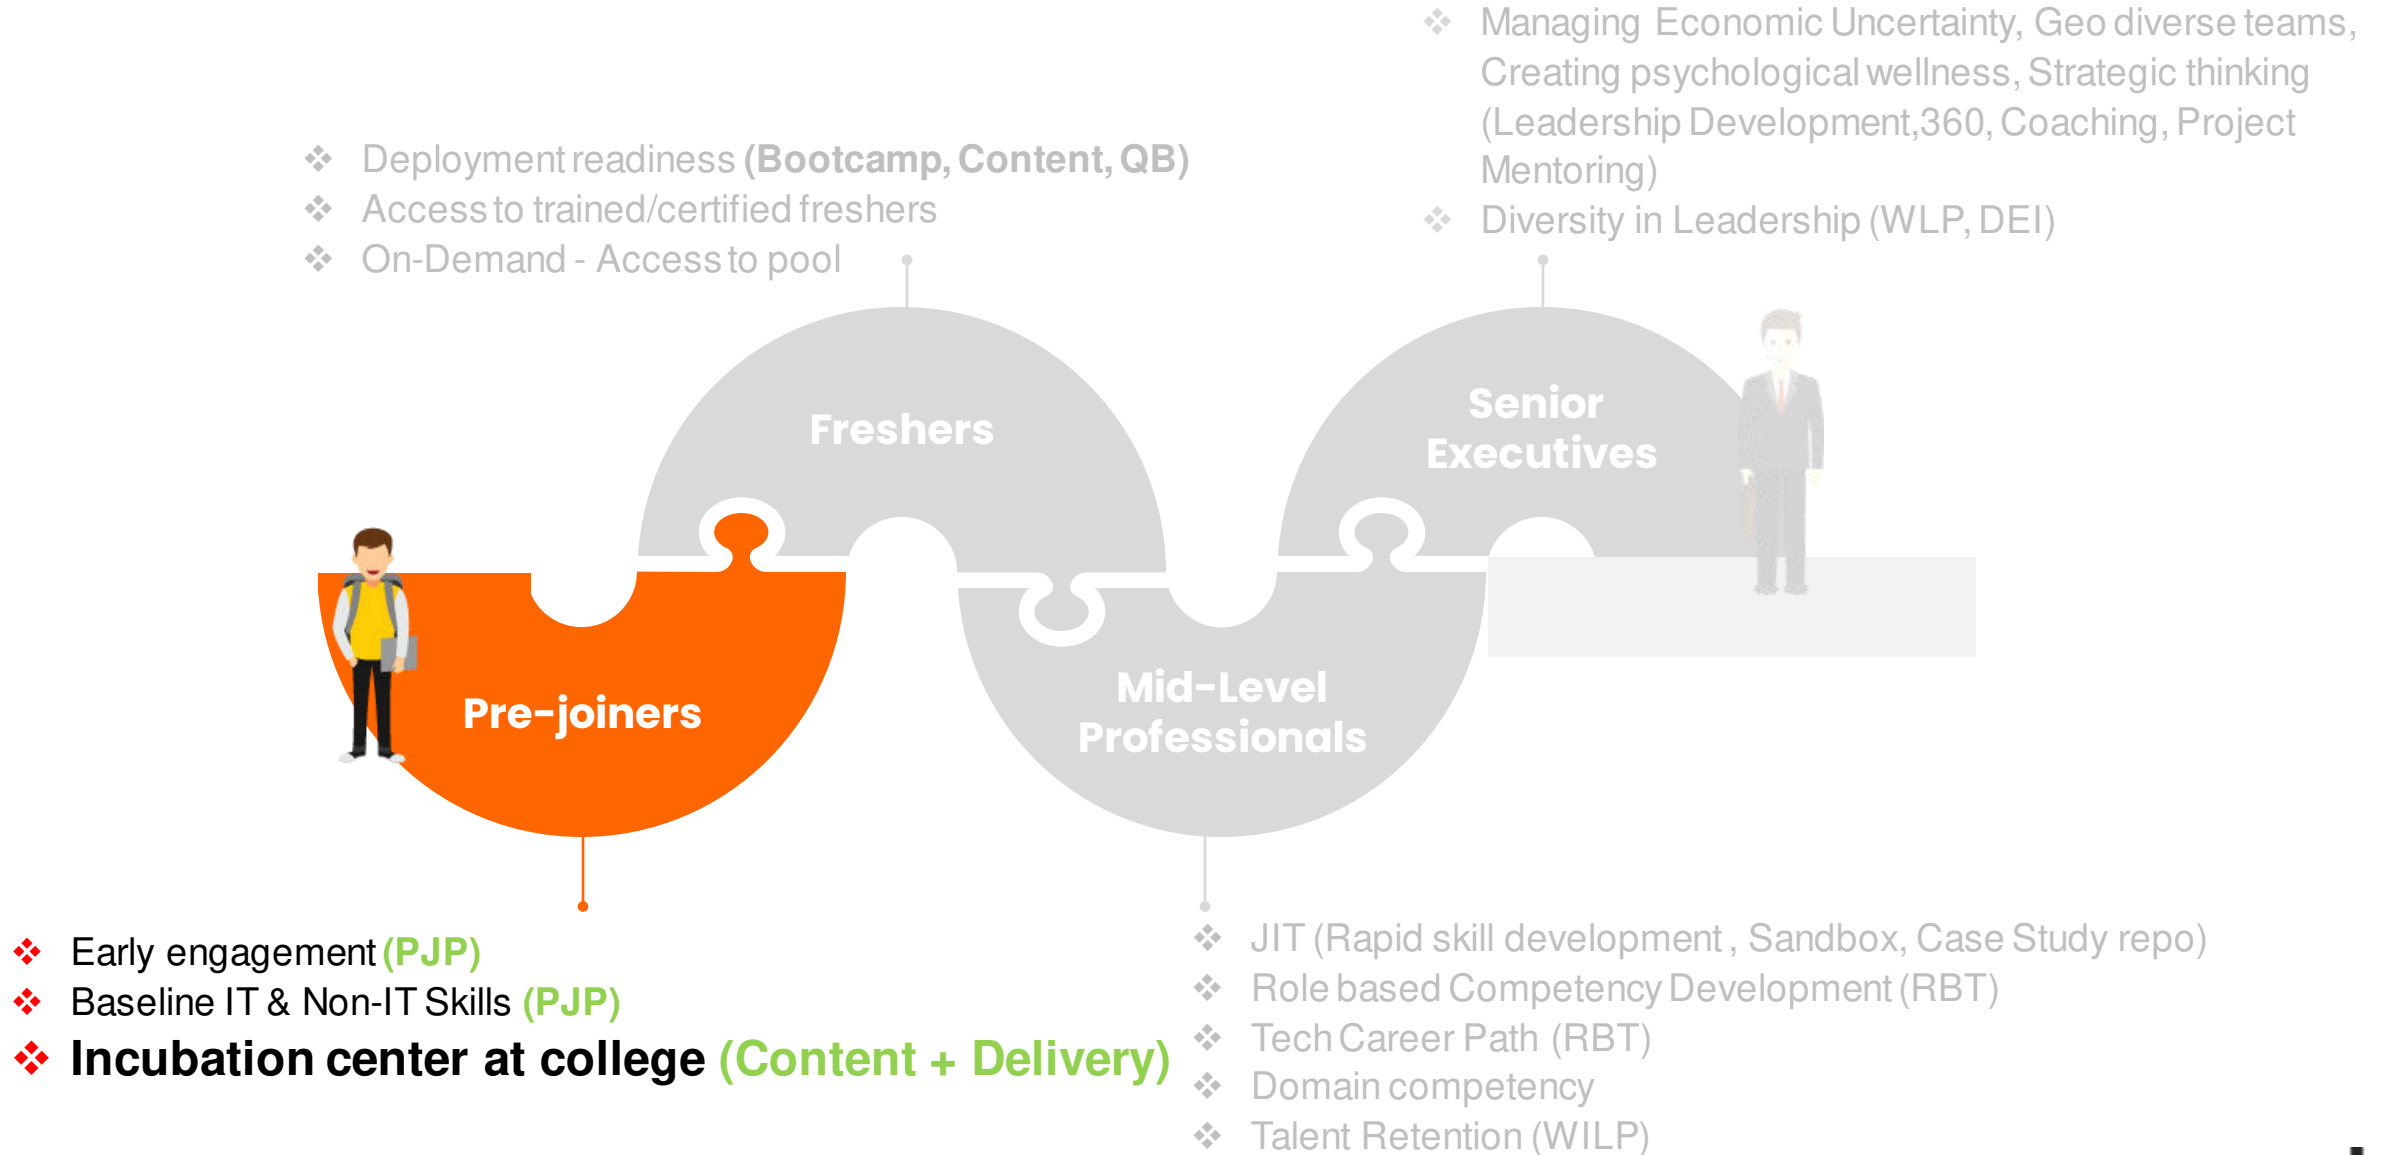

Advantages for organization

- ❖ Reduction in training days
- ❖ Motivated for self-learning
- ❖ Resource Planning
- ❖ Talent Retention
- ❖ Direct Cost Saving

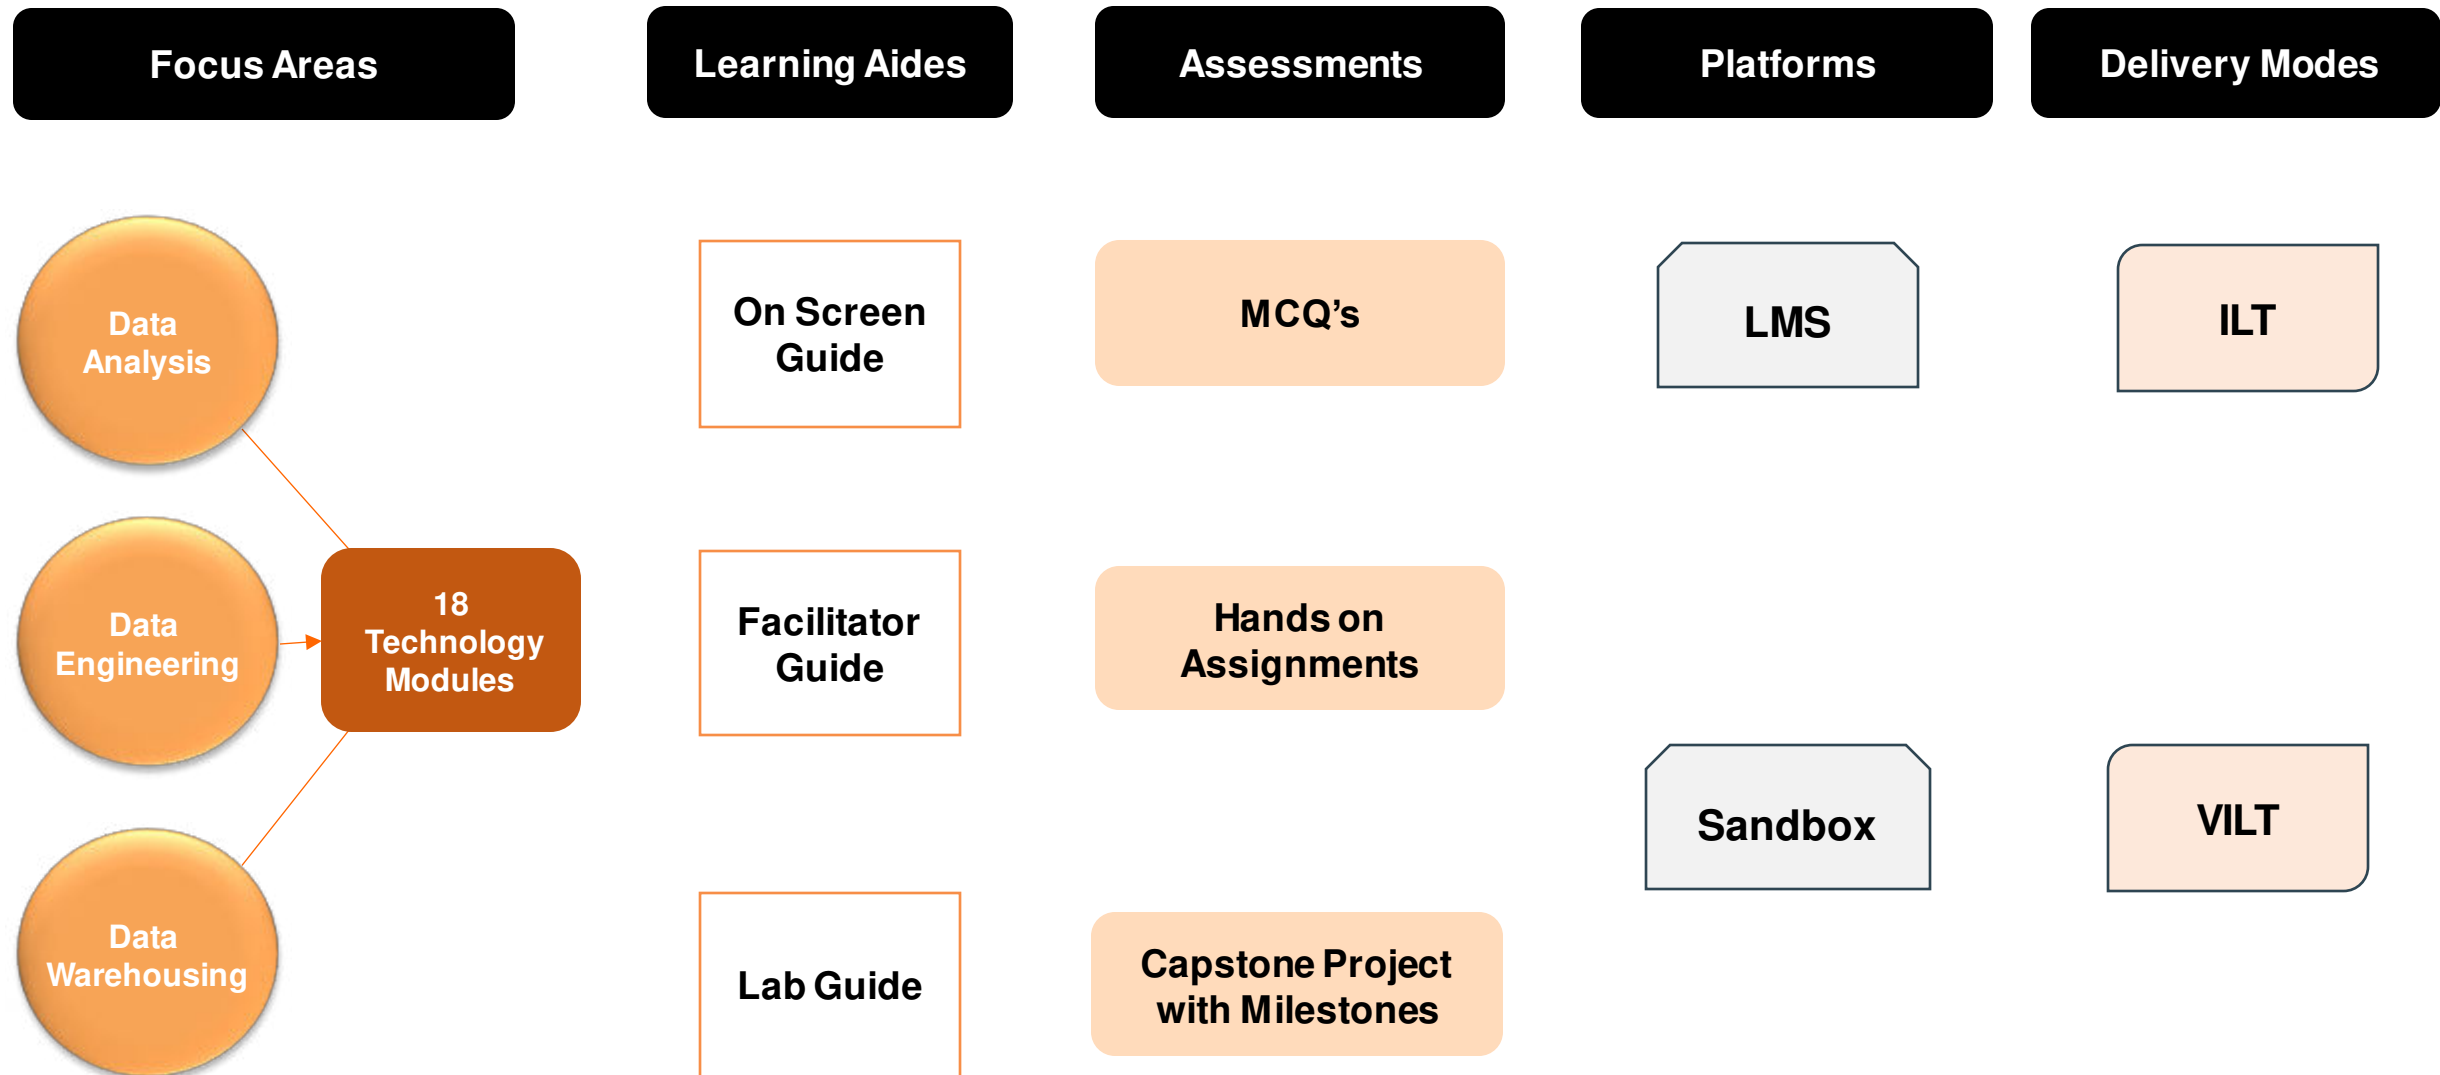

Advantages for Individuals

- ❖ Learn to troubleshoot issues and imbibe the culture of self-learning
- ❖ Testing the code – automated test cases
- ❖ Discipline – meet deadlines
- ❖ Get used to the culture of remote proctored assessments
- ❖ Teamwork through ASK forum

Employee Need –Solution Life Cycle

Incubation Centre – Sample Data Science Program Structure

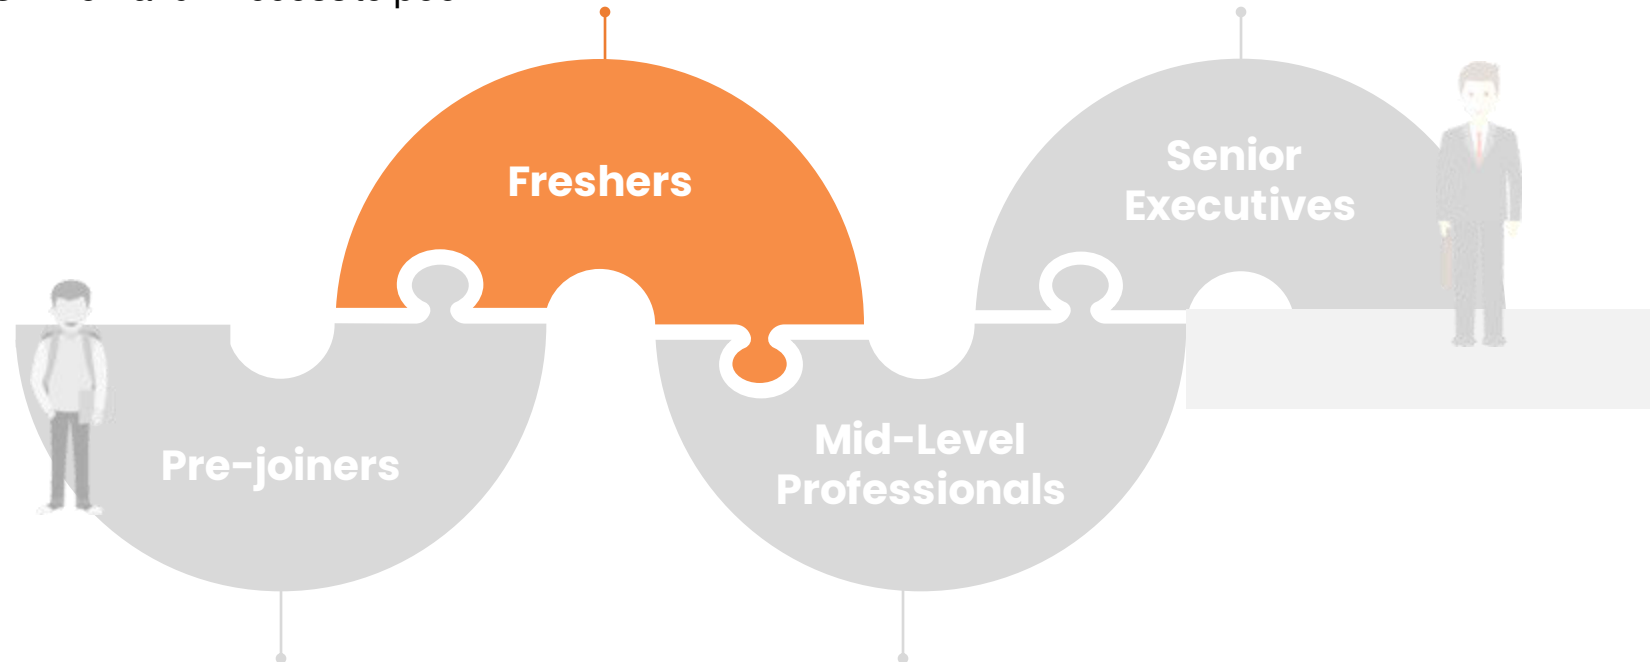

Employee Need –Solution Life Cycle

❖ **Deployment Readiness (Bootcamp, Content, QB)**

- ❖ Access to trained/certified freshers
- ❖ On-Demand - Access to pool

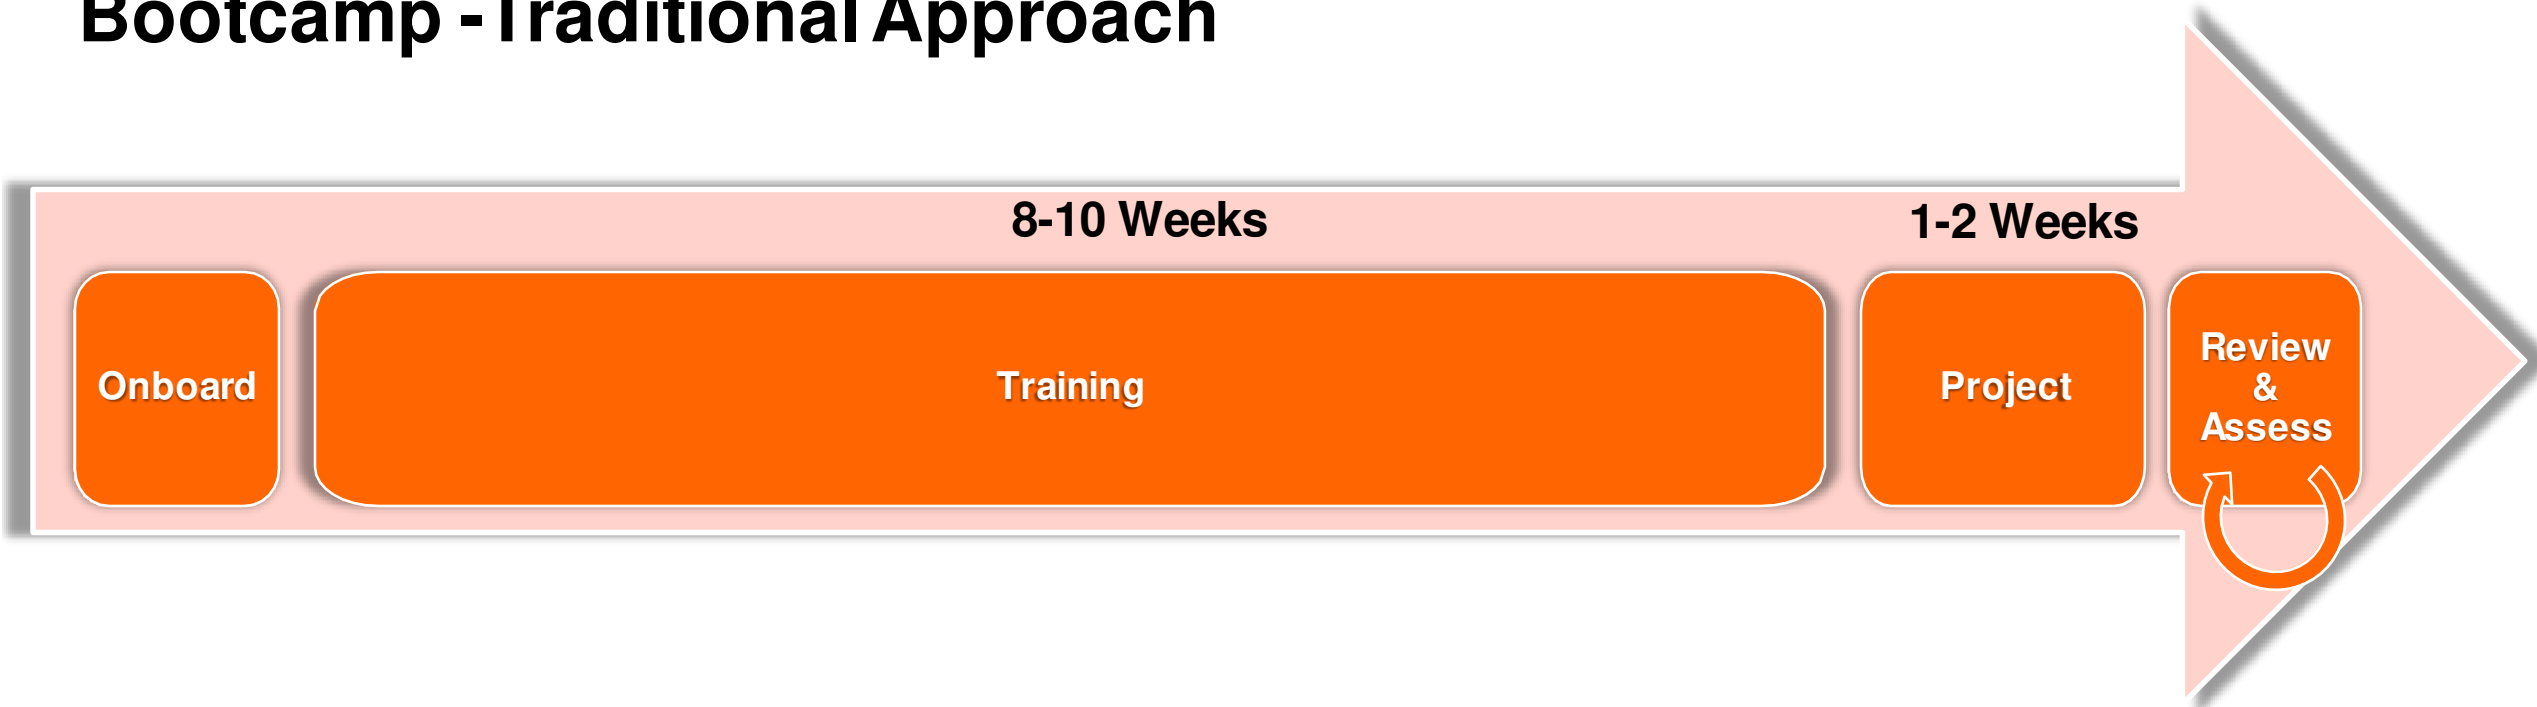

- ❖ Managing Economic Uncertainty, Geo diverse teams, Creating psychological wellness, Strategic thinking (Leadership Development, 360, Coaching, Project Mentoring)
- ❖ Diversity in Leadership (WLP, DEI)

- ❖ Early engagement (**PJP**)
- ❖ Baseline IT & Non-IT Skills (**PJP**)
- ❖ Incubation center at college (**Content + Delivery**)

- ❖ JIT (Rapid skill development , Sandbox, Case Study repo)
- ❖ Role based Competency Development (RBT)
- ❖ Tech Career Path (RBT)
- ❖ Domain competency
- ❖ Talent Retention (WILP)

Bootcamp -Traditional Approach

What works

- ✓ Simple to execute

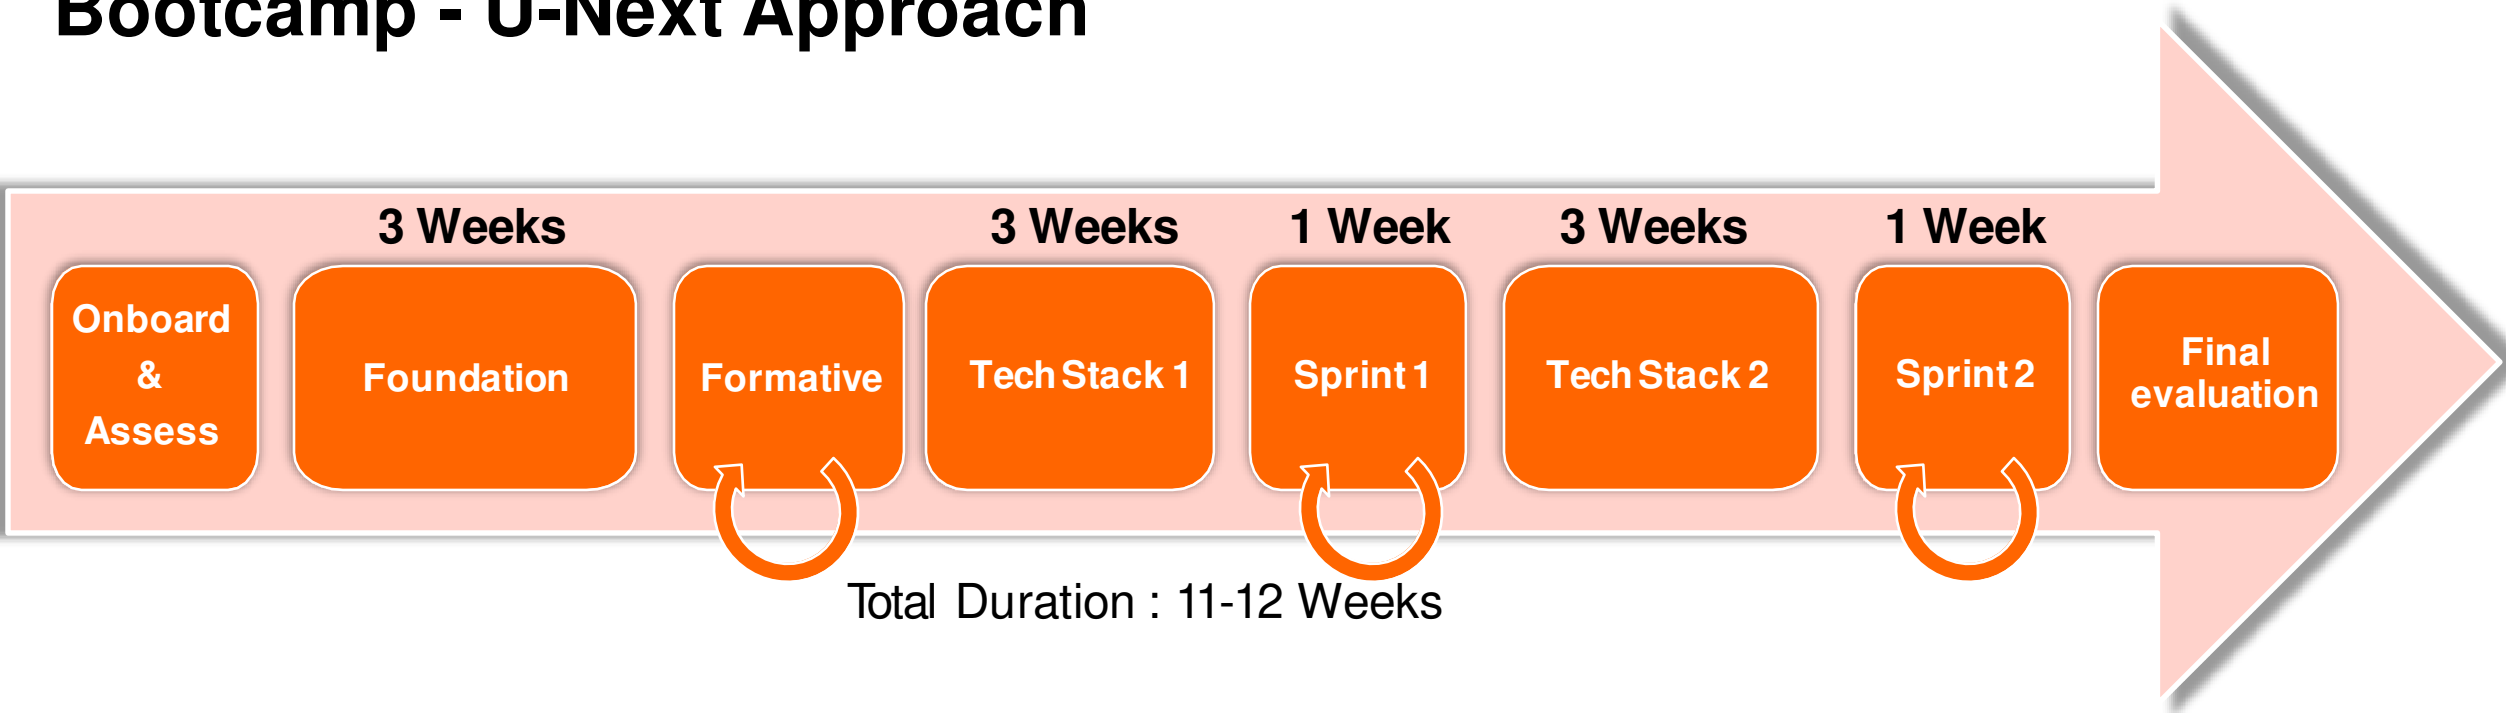

Challenge

- ✗ One size doesn't fit all
- ✗ Not agile
- ✗ Delayed feedback
- ✗ Low engagement
- ✗ Output focused

Business feedback on learners

- ✗ Low on programming skills
- ✗ Don't demonstrate problem solving skills
- ✗ Limited standards/processes knowledge
- ✗ Unsatisfactory at articulation/presentation
- ✗ Low on deployment capability
- ✗ Lack of confidence

Bootcamp - U-Next Approach

What works

- ✓ Iterative review/feedback
- ✓ Fail fast, Learn from failure culture
- ✓ Engagement, Effectiveness
- ✓ Retention and reinforcement of learning

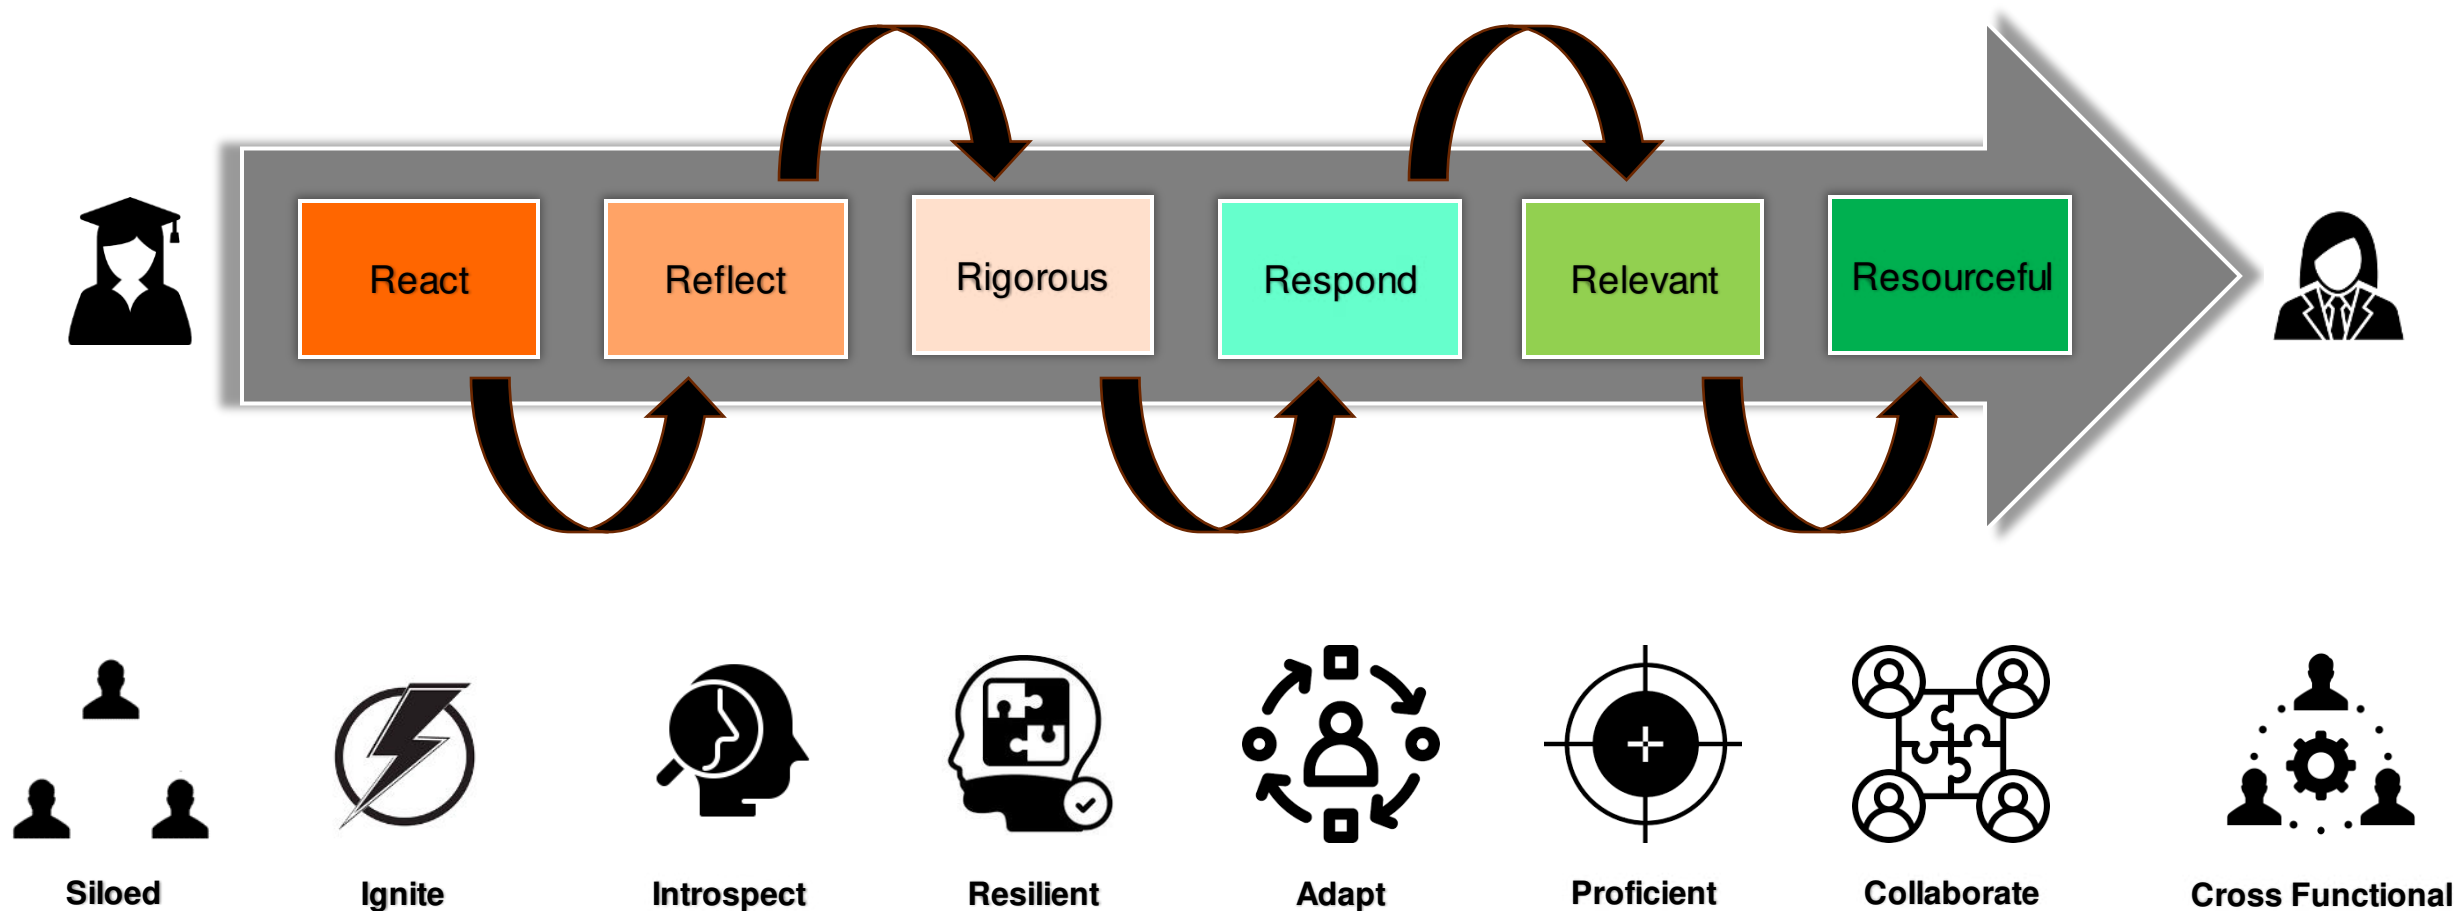

Support provided

- ✓ Proactive Monitoring
- ✓ Predictive Performance

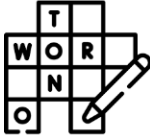

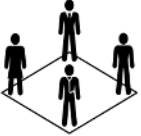

Business feedback on learners

- ✓ Good with programming skills
- ✓ Appreciation of processes, standards
- ✓ Good at articulation/presentation
- ✓ Good deployment capability
- ✓ Confident in execution

Business Aligned Behaviors

Wholistic Empowerment via Simulation

Capability	Programming Foundation	Deployment Foundation	Site Reliability Engineering	IT Infrastructure Management & Services	Real Time case study
Knowledge	Java, .NET, DB, QE/QC, SDLC, DevOps, JIRA, GIT	Linux, Web server, Microservices, Docker, Jenkins, Kubernetes, Ansible	Observability, Automation, SLA, SLE, SLO	ITSM, ITIL, ServiceNow	Final Project

Traditional Approach

Linear Way of Learning

Project Based Approach

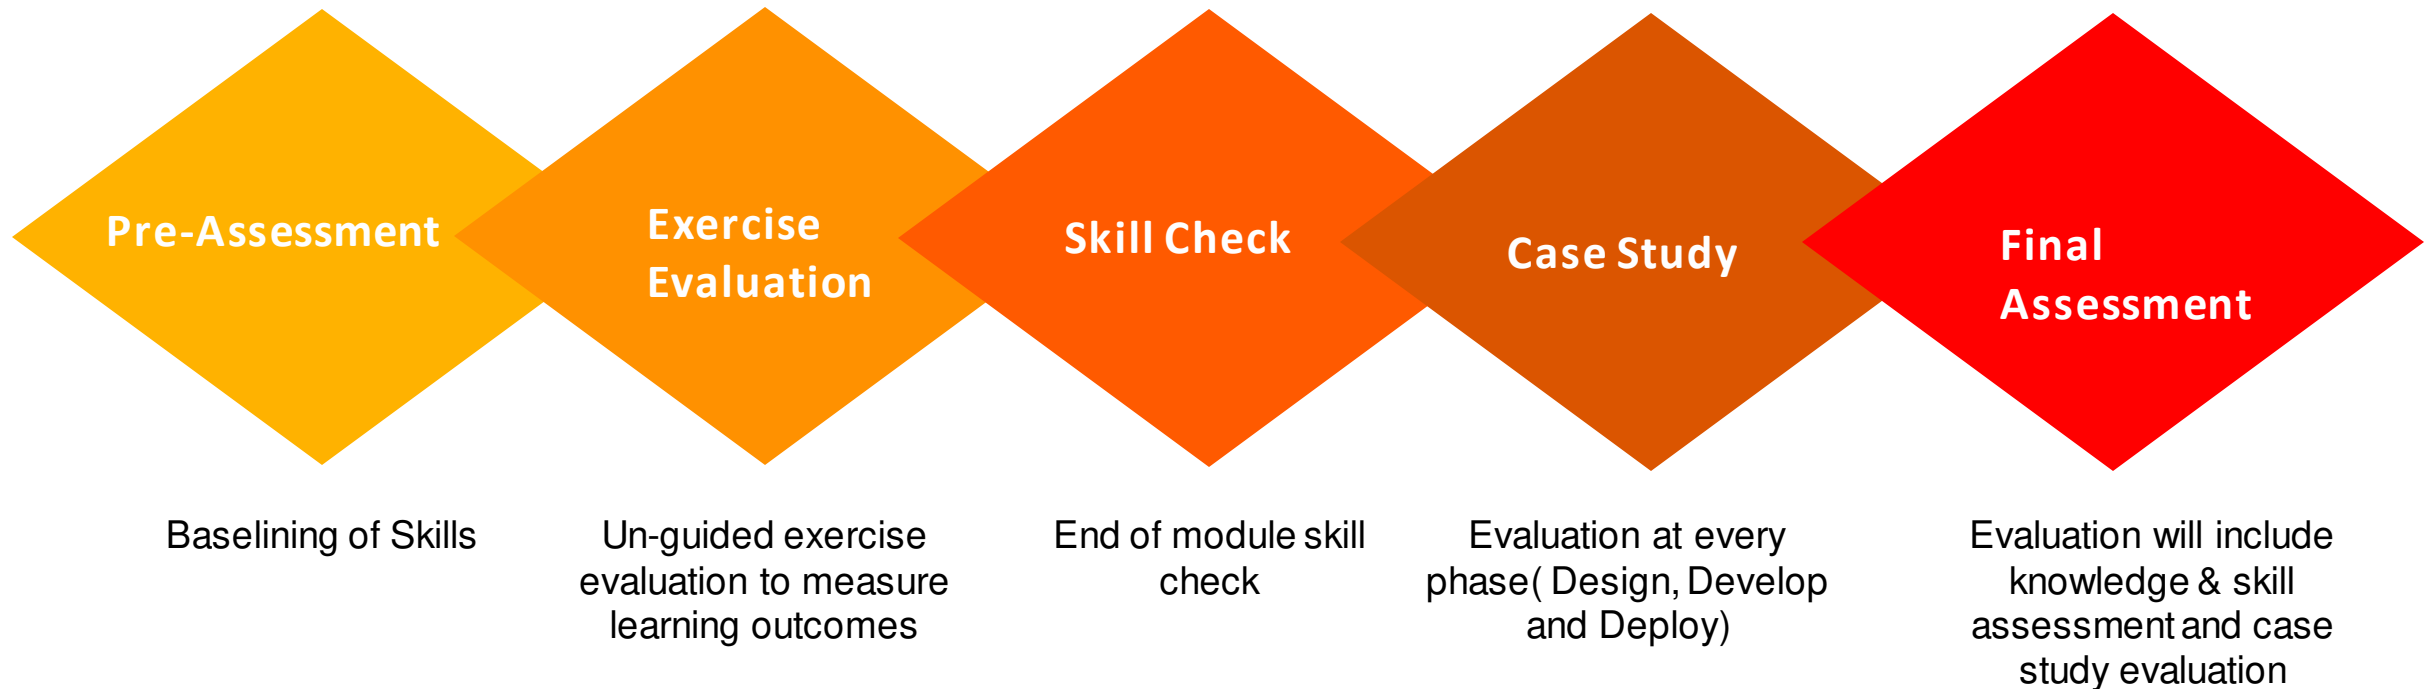

Iterative Way of learning

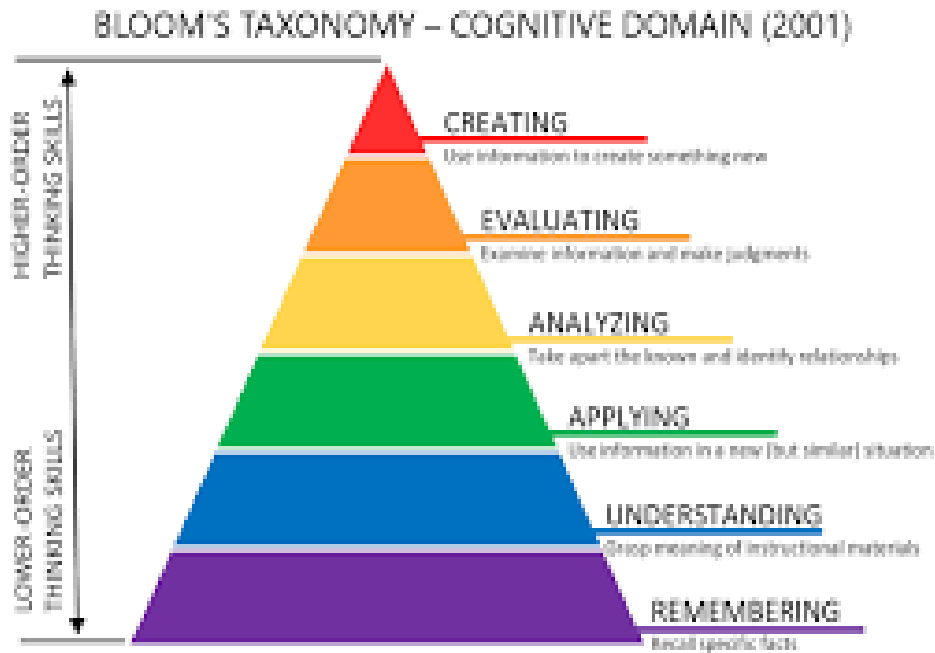

Sample Case Study Repository

Sl.No	Case study	Domain	Description
1	Forecasting Airline Passengers	Aerospace	Forecast the monthly airline passengers for the next three calendar years. A detailed recommendation aiming to boost revenue must accompany the results.
2	Unmasking Credit Card Fraud: Leveraging Machine Learning for Proactive Detection	BFSI	In this research case study, we delve into the pervasive issue of credit card fraud and propose a proactive machine-learning approach for fraud detection.
3	Mask identification at Bank		A popular bank is facing challenges with its facial recognition system due to an increasing number of customers wearing face masks during the COVID-19 pandemic. To overcome this issue an ML/DI model needs to be developed.
4	Modernizing the Oakville Bank System		By leveraging the power of Python and database technology, this system revolutionizes traditional banking practices and sets the foundation for an efficient and modern banking experience.
5	Currency Exchange Odyssey		Currency Converters aim to maintain real-time information on current market or bank exchange rates so that the calculated result changes whenever the value of either of the component currencies does.
6	Credit Assessment in Financial Services		Determining whether customers are likely to repay the loan amount, thereby reducing NPAs and increasing profitability.
7	Stock Management		Automate and improve the stock management process by creating a database driven.
8	Indian Stock Market Analysis		Forecast the stock prices of selected constituents of the Sensex while understanding the impact of critical events along with the influence of interest rates on market performance.
9	Quality Control in Concrete	Construction	Using ML/DL model to solve the problem of measuring concrete compressive strength without additional equipment.
10	E-Commerce Review sentiment analysis	E-commerce	An E-commerce company is tackling the challenge of varying sales for different products and aims to enhance customer satisfaction by providing insights on product quality and user feedback.
11	Data Modeling for E-commerce with MongoDB		Efficiently tracking inventory, handling order processing, managing payments, and building strong customer relationships demand a well-
12	Patient Record Monitoring System	Healthcare	The Patient Data Management Application ensures streamlined storage, retrieval, and maintenance of patient records.
13	Predicting Medical Expenses		Insurance companies determine their premiums based on various factors and considerations. The goal is to set a price that is sufficient to cover potential claims and operating costs while remaining competitive in the market
14	Ohio Clinic—Meeting Supply and Demand		Addresses the issue of overcoming losses in the healthcare domain.
15	News Article Analysis	Media	The web development team at the media corporation, needed a solution to categorize millions of news articles on their website efficiently.
16	Data-Driven Insights for Sales Forecasting	Retail	Explores how Tesco Supermarkets leveraged data-driven approaches to gain valuable insights and make informed decisions.
17	Retail data set		A retail company "ABC Private Limited" wants to understand the customer purchase behavior (specifically, purchase amount) against various products of different categories.
18	Toy Rental		Offer premium toys on rent based on a survey revealing kids' short attention spans and parents' affordability challenges.
19	Customer Purchase Behavior Analysis in Retail		Understand the customer purchase behavior (specifically, purchase amount) against various products of different categories.
20	Adidas Retail Stores Segmentation		Segment the adidas retail stores to gain valuable insights into the performance of its retail stores.
21	Customer Churn Prediction for Telecommunication Company	Telecom	Developing a machine learning-based system for Customer Churn Prediction at Telecommunication Company enabling the timely identification of customers at risk of churning and facilitating personalized retention strategies.
22	Customer Segmentation and Targeted Marketing for Telecommunication Companies		The objective is to enable personalized marketing campaigns that effectively engage different customer segments, leading to improved customer satisfaction, retention, and revenue growth

Motivation

This program fills a gap in training in the natural evolution of a technical professional who want to pursue a technical career path

There are very few structured training programs

Most programs focus on functional areas

Leadership and professional skills are left to the individual to develop

Normally, technical professional needs help to understand what it takes to succeed

Very few role models on the technical axis from whom aspiring architects can learn

There is a need therefore, for a program that helps professionals manage the above challenges

Advanced roles that senior technical professionals do not have structured development opportunities e.g., pre-sales, solutioning architect, product architect etc.

Criteria Used to Design Assessments

Employee Perspective

- Fair and perceived to be fair
- Decision is not based on a single event
- Takes overall performance into consideration
- Leads to possible developmental interventions

Organization Perspective

- Must truly differentiate performers
- Defensible
- Leads to possible developmental interventions

Process Perspective

- Easy to implement
- Repeatable
- Reliable
- Robust

Competences to be Measured

Functional Competences

*Further slides will cover a sample implementation for a delivery organization

List of Competences for Delivery Organization - Sample

Leadership Competencies	Professional Competencies	Functional Competencies
<ul style="list-style-type: none">• Building a Collaborative Culture and Mindset• Coaching for performance• Delivers on commitment• Intrapreneurial Mindset• Story-telling• Displays confidence• Being trustworthy• Networking	<ul style="list-style-type: none">• Problem Solving• Conflict resolution• Negotiation• Decision Making• Drives urgency• Emotional Intelligence• Communication skills• Tenacity• Curiosity	<ul style="list-style-type: none">• Commercial savviness• Project/Program Management• Innovation Management• 6-sigma toolset• Market insights & Analysis• Business Strategy• Technology Strategy• Delivering against commitment• Clients' s Service Offerings

Levelling is based on ...

- Competence is a combination of Knowledge, Attitude, Skills, Habits
- Knowledge and Skill can be measured through self-assessments
- Attitude and Habits are through behavioural assessments
- Three sources of inputs that will be used for levelling:
 - Psychometric – MBTI, DISC, Hogan etc
 - 360-degree assessment (Self, Manager, Peers, Team members)
 - Case-study based self-assessment

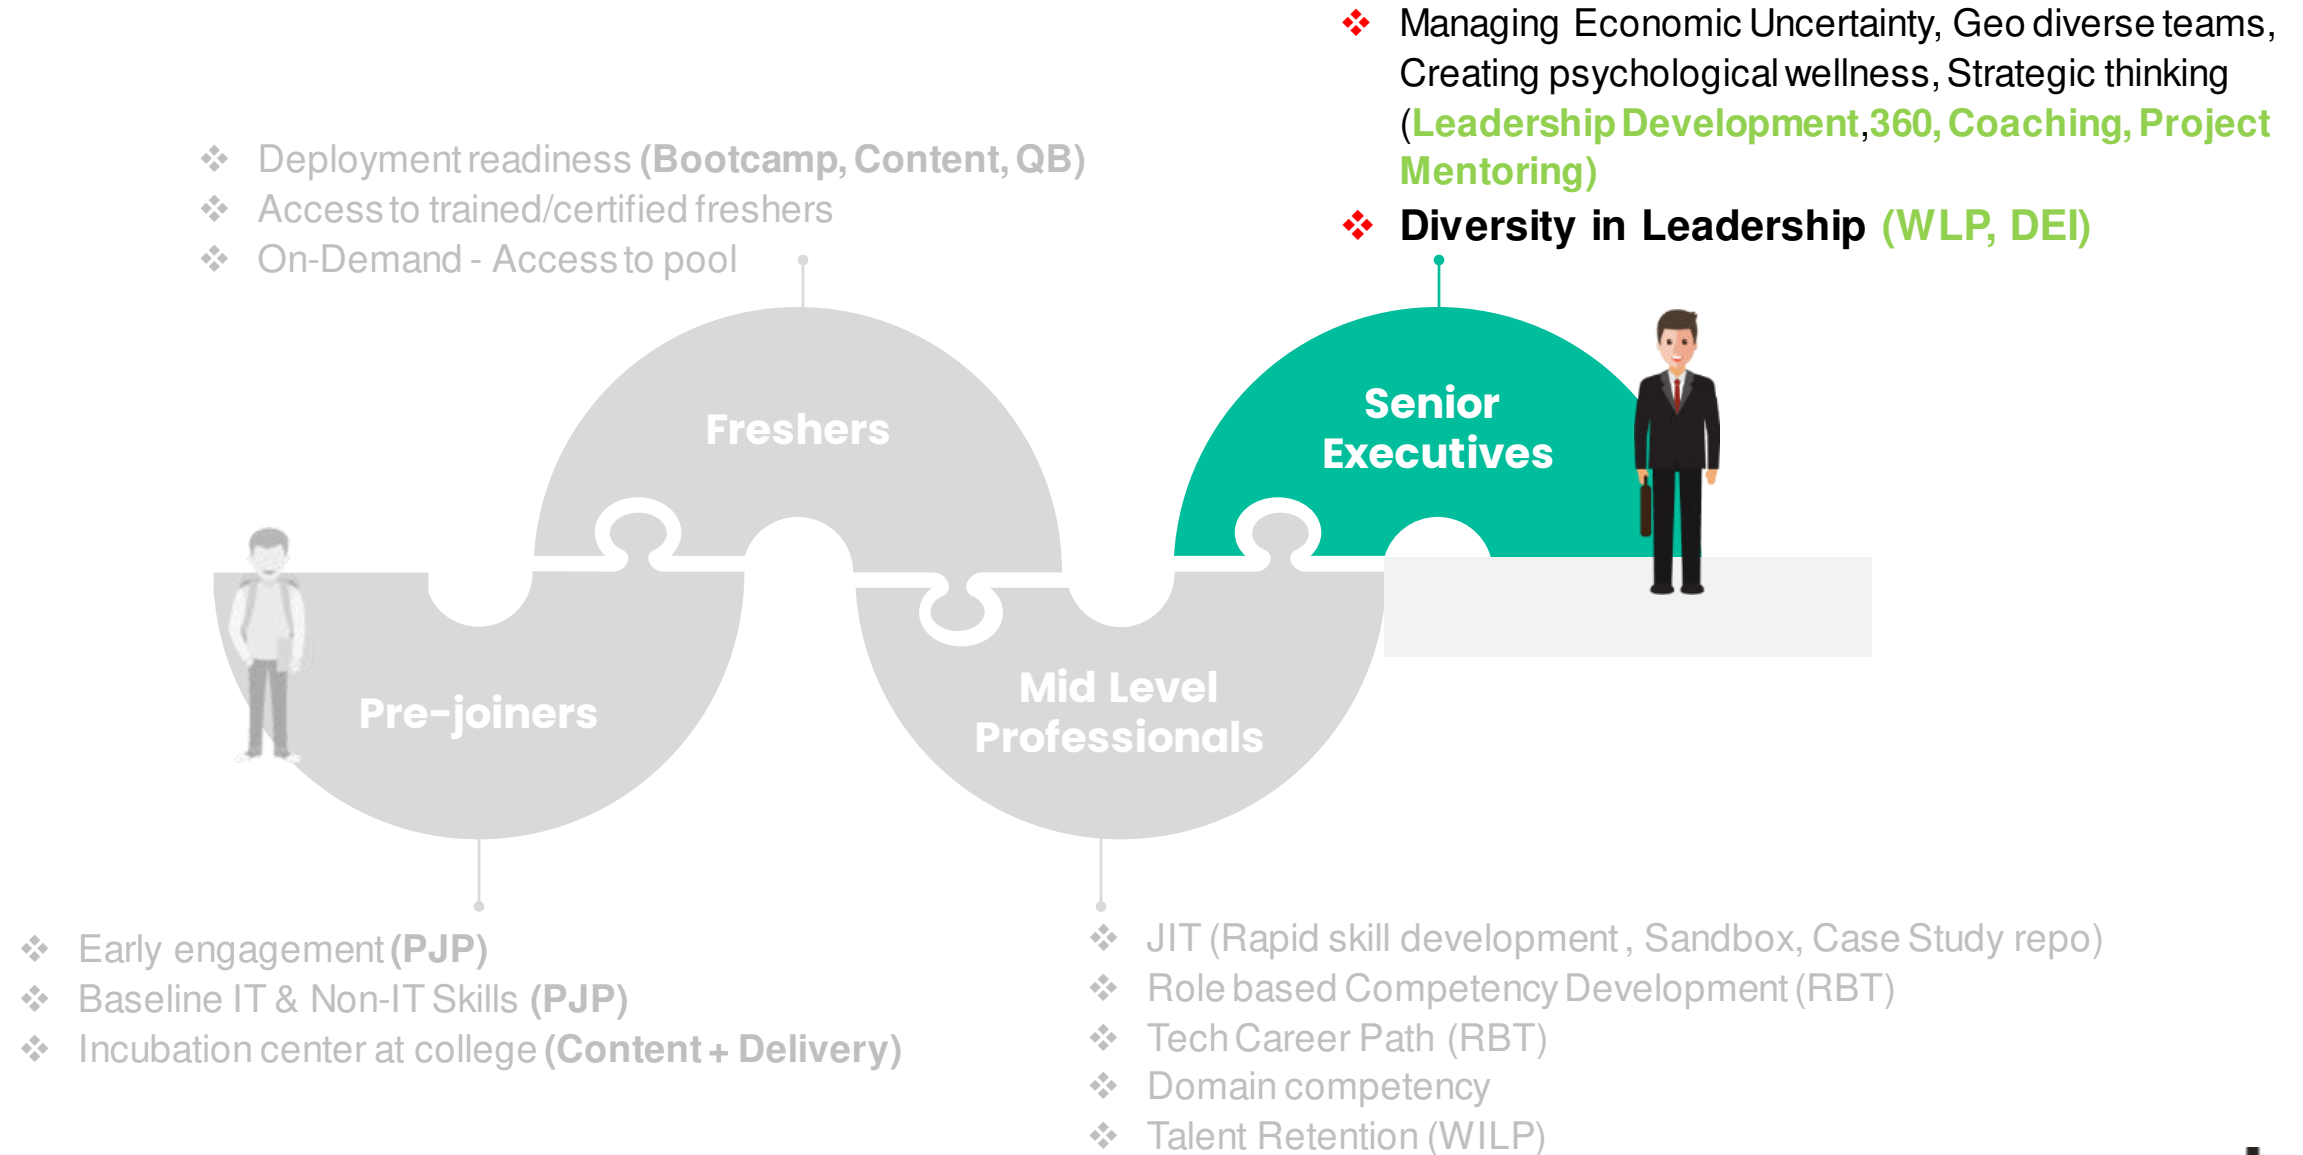

Grading Per Competence Per Individual

Strength/Weakness
Individual Development Plan
How well He/She is playing the current role

				Role 1	Role 2	Role 3
	Outcomes expected from the Role	Novice	Basic	Practitioner	Expert	Guru
C1	Building trusted relationship across the Client organization			Y		
C2	Understand the client's business & IT strategy/roadmap			Y		
C3	Understand the competitive landscape of the client			Y		
C4	Bring Market trends/Analyst POVs/client's offerings on Client/Account relevant areas			Y		
C5	Understand the Contract/SOW – KPI+, POR, Deliverable etc.			Y		
C6	Drive delivery by standard metrics – Cost, effort, schedule, quality		Y			
C7	Drive innovation & Continuous improvement agenda				Y	
C8	Drive the QBRs and other client meetings as applicable				Y	

- 1) A person at Novice level may have knowledge but no experience on the competences being measured
- 2) Minimum expectation for a Role 1 is he/she should be at the practitioner level
- 3) Minimum expectation for a Role 2 is he/she should be at the expert level
- 4) Expectation for a Role 3 is he/she should be at the guru level

LumenAI – Enhancing Learning Outcomes

Simple & Expert Explanation with LumenAI

The screenshot displays the LumenAI interface within a learning management system. On the left, a sidebar titled "Crash Course in Accounting & Finance" lists various topics like "Basic Accounting Concepts", "Advanced Concepts", "Balance Sheet", "Profit & Loss Account", and "Varied accounting topics and techniques". The main area shows a document titled "CHAPTER 2 DEFINITIONS, ACCOUNTING CONCEPTS & ACCOUNTING CONVENTIONS". An orange overlay titled "Explain with LumenAI" is positioned over a selected text block, providing a simplified explanation: "Accounting is a process of recording, summarizing, analyzing, and reporting financial transactions." Below this, a "Get Better Explanation" button is visible. The interface also includes navigation controls like "Prev" and "Next", and a bottom section titled "Varied accounting topics and techniques" with a detailed paragraph about the Accounting Unit entity.

CHAPTER 2

DEFINITIONS,

ACCOUNTING CONCEPTS &

ACCOUNTING CONVENTIONS

2.1 The various terms used in this Accounting Manual, the Accounting Concepts and Accounting Conventions under the Accrual System of Accounting are defined in this chapter. The objective of this chapter is to ensure a common understanding of the terms often used in the Manual as well as to promote consistency and uniformity in their usage.

DEFINITIONS

2.2 The definitions of the terms used in this manual are those which are commonly understood and used. These have been taken, if available and appropriate, from:

- Dictionary of Accounting by Eric L. Kohler; or
- "Guidance Note on Terms used in Financial Statements" issued by the Institute of

Overview Transcript Notes Q&A Rating Explanation

Varied accounting topics and techniques

The Accounting Unit entity represents something that can be measured, and is qualified by the Accounting Unit Type classification entity. The Accounting Unit entity can then be associated with any other fundamental concept, such as an arrangement or an involved party. This association represents the link to what is tracked by the accounting unit. Common specializations for those who study finance at degree level

Summarizing Content with Lumen-AI

SummarizeMe with LumenAI

Content Summary:

- **Systematic Process of Recording:** Accounting involves the systematic and organized recording of financial transactions. This process ensures that all financial activities, such as sales, purchases, and expenses, are accurately documented and classified.
- **Summarizing Financial Transactions:** Accountants summarize the recorded transactions periodically, typically at the end of an accounting period (e.g., monthly, quarterly, or annually). This step involves aggregating similar transactions to create meaningful financial reports.
- **Analyzing Financial Data:** Accounting also involves analyzing financial data to gain insights into the financial health and performance of the individual, business, or organization. Through

Presenting Epic.U

The Social Learning & Collaboration SuperApp from UNext

What Is Epic.U?

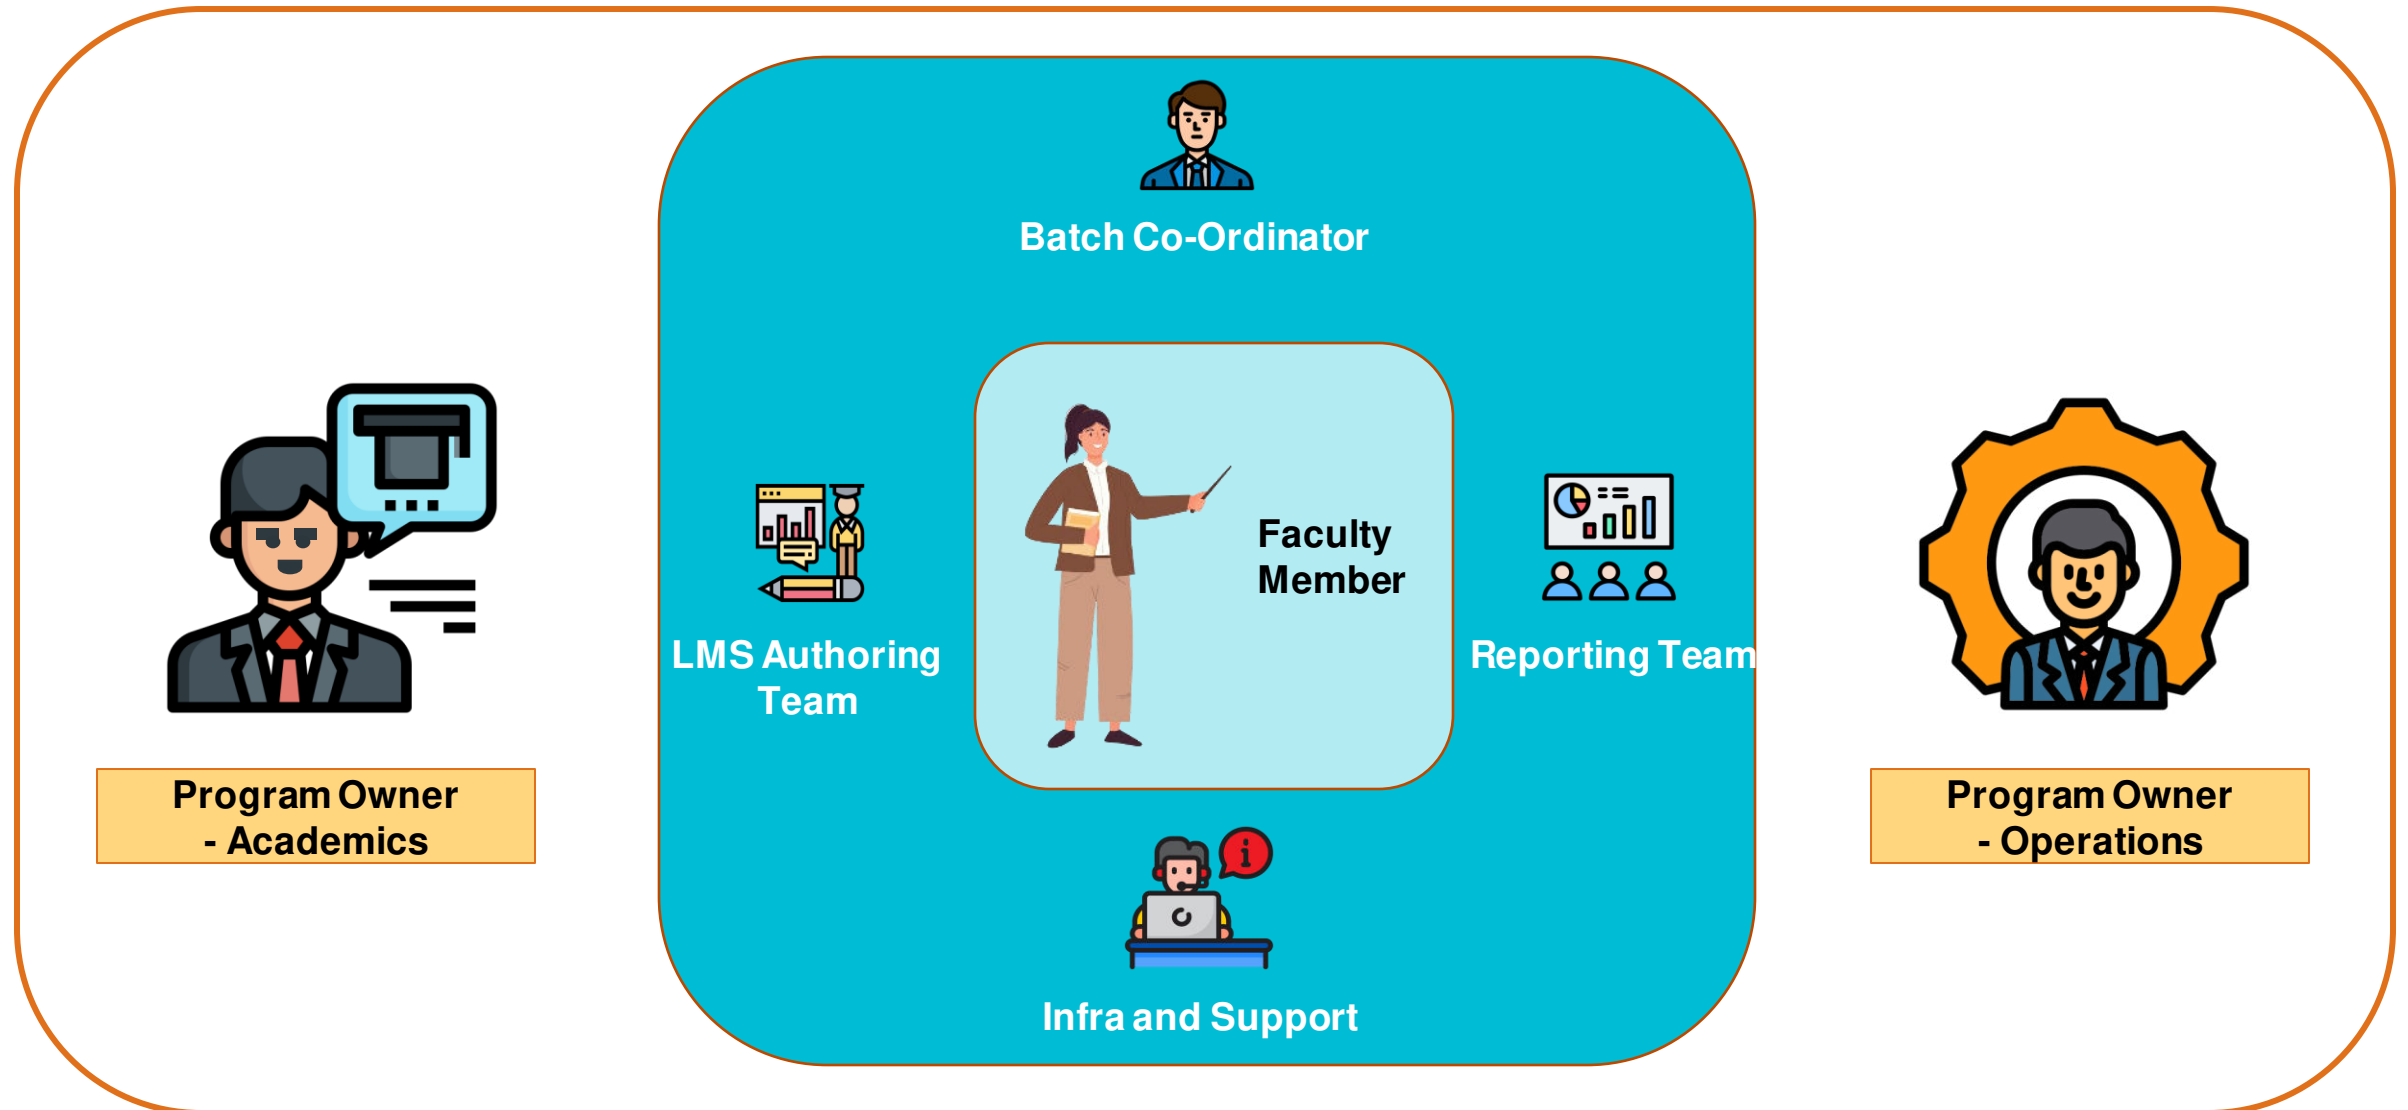

It's the ultimate social learning & collaboration app where members can engage, feel empowered, and ultimately excel at workplace.

How Epic.U Elevates Workforce Transformation?

- ✓ Cultivate the DNA for peer learning & collaboration
- ✓ Create, curate, and share topic-specific articles and posts
- ✓ Go live and have real-time sessions, seminars and meetups
- ✓ Knowledge sharing through debates, surveys, and polls
- ✓ Powerful networking opportunities with management
- ✓ Options to customize, white label, or manage the solution depending on enterprise-specific requirements
