UNext

Unleash The Power Of Generative AI For Your Business

Explore Tailored Workforce Development Programs On Generative AI From UNext

Generative AI – The Productivity Super-catalyst

The ability to create and visualize the abstract is what distinguishes Generative AI from AI. Thanks to its ability to quickly deliver requirements, Generative AI is revolutionizing conventions with its applications across industries.

66%

This is how much **workplace productivity is boosted** with Generative AI. Not just that. Conflict-resolutions in customer service **are increasing by 15%.** The **BFSI sector** is also witnessing a **2.8% increase in productivity** thanks to this emerging technology.

To leverage the complete potential of this technology, however, demands **advanced capabilities** in workforces. Unlike regular training programs, the approach for transformation programs on Gen AI should be systematic and well-defined for different hierarchies and roles.

That's where **UNext** stands out with its **most practical, industry-relevant, and domain-specific** training program tailored to individual organization needs.

# Presenting High-Impact Bespoke Generative AI Training Programs From UNext

The extensive programs from UNext are targeted at transforming three distinct personas in your enterprise workforce:

| Users | Developers | Implementors |

Infrastructure Engineers

Data Engineers

Prompt Engineers

Every employee across every function

Implementors

Users

The
AI Smart
Organisation

Developers

SW Engineers, Data Scientists, Data Engineers, Visualisation experts, Algorithm Specialists

Implementors
Decide and deploy infrastructure required for Gen AI
Enable the implementation of LLMs
Build and curate data models
Design user friendly prompt schema

Users
Understand applications of Gen AI in functional teams
Effectively leverage Gen AI tools to improve productivity

Developers
Use DL/NLP techniques to build applications
Design and build custom LLMs
Pick the right models
Interface with popular off-the-shelf LLMs

Our bespoke programs stand out in the fact that modules are conceptualized and conceived to be relevant to the roles and responsibilities of each specific persona. This instills role-specific competencies that ultimately translate to maximum learning and operational impact.

Sample Program Structures*

Learner Persona	Programs
Users	Introduction To Gen AI
	Gen AI For All
	Leveraging Gen AI Tools For Productivity Hacks
	Generative AI For L&D
	Generative AI For Spreadsheets
Developers	AI Assisted Programming For Developers
	Generative AI For Data Scientists
	Building And Customizing LLMs
Implementors	Generative AI For Engineering
	Prompt Engineering

*The program structure is only indicative. Modules can be customized.

Key Highlights Of Our Programs

- Identification of skill gaps followed by competency-outcome mapping

- Custom program and curriculum development from scratch

- Modules featuring ethical and responsible AI

- Advanced tips and tricks in Generative AI

- Learning and interaction with the most veteran faculty and SMEs from the AI space

- Outcome-specific and bias-free prompting practices

- GPT- 4o customization with prompt engineering and more

Enterprise Benefits Of Becoming Gen AI-ready

Leadership
Develop airtight policies, optimize product strategy and positioning, competitor analysis and market penetration suggestions, financial forecasting including RoI, and more

Finance Teams
Automate data entry tasks, extract and summarize insights from invoices and vouchers, financial forecasting, modelling, and reporting, A/R management, and more

Human Resources And L&D
Resume screening and talent mapping, optimize performance reviews and appraisal plans, diversity and inclusion initiatives, develop personalized learning paths for training, and more

Marketing
Develop content and marketing strategies for diverse channels, write blogs and copies for ads, A/B testing of campaigns, hyper-personalization, video and media creation, and more

Sales
Lead generation through customer data analysis, sales script optimization, pricing optimization, chatbots for lead qualification, automate CRM management, and more

Operations & Management
Identify and deploy process automation, predictive analytics, inventory management, supply-chain optimization, fleet monitoring and automated order fulfillment, and more

Software Developers & Architects
Code generation, debugging and testing, document codes, code optimization, assisted architecture designing, code integration and reviews, code loophole and vulnerability detection, and more
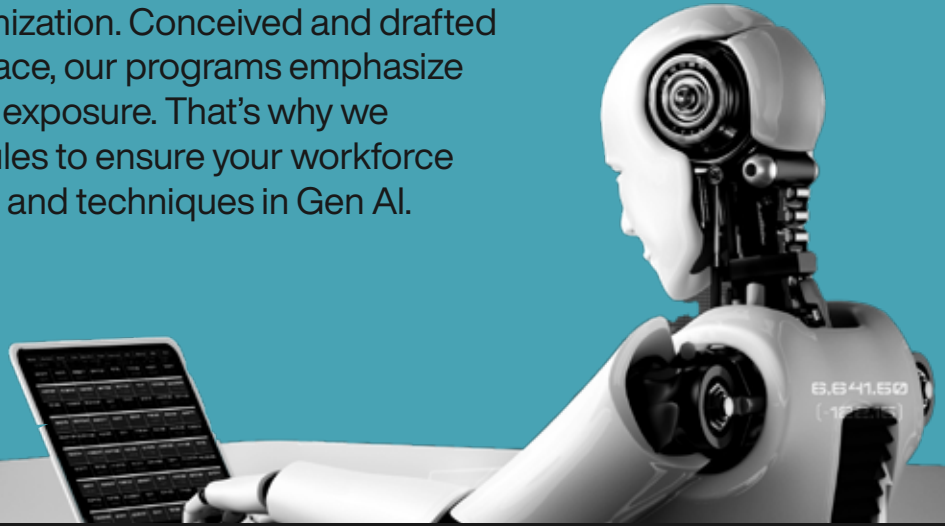

Data Scientists
Data cleaning, data augmentation, automate model selection and hyperparameter tuning, anomaly detection, time series forecasting, develop airtight recommendation systems, and more

Accomplish More With A Gen AI-ready Workforce

The program is extensive and unleashes specific capabilities across diverse teams in your organization. Conceived and drafted by SMEs and veterans in the AI space, our programs emphasize hands-on training over theoretical exposure. That's why we feature experiential learning modules to ensure your workforce gains mastery over the latest tools and techniques in Gen AI.

Unlock Maximum Business Productivity And Performance With UNext

Harnessing the potential of Gen AI is easy when training with the right transformation partner. As an **Economic Times-certified Future-Ready Organization**, we ensure your workforce has the best transformation journey in gaining advanced competencies in this emerging technology.

Partner with us to tailor a program on Generative AI today

About UNext

We are a next generation online learning organization with best-in-class content and technology stack, offering programs in data science and emerging technologies. Our enterprise training prioritizes 360-degree workforce development through upskilling, offering industry-relevant programs that help enterprises transform their talent through customized learning solutions across hierarchies.

Backed by the vision and capability of our in-house subject matter experts and 300+ top-notch industry-based faculty pool, we have helped 100+ enterprises across industries & domains deploy the most futuristic and competent abilities.

Some key highlights:

15+ years
of providing learning solutions

40,000+
Pre-joining programs

20,000+
Corporate bootcamps

6,000+
Role based programs

Our partnerships in training tech and non-tech audiences span across multiple industries such as IT-ITeS / BFSI / Automobiles / Healthcare / Manufacturing / Consulting / Retail / Pharma & more.
