

Unlock Unprecedented Enterprise Agility

A large, semi-circular graphic composed of many thin, vertical lines in shades of orange, yellow, and green, creating a tunnel-like effect. To the right of this graphic is a rectangular image showing a group of business people in a futuristic, brightly lit tunnel with many light streaks radiating from the center, suggesting speed and innovation.

Empower Your Workforce With
DevOps Capabilities With UNext

A decorative graphic on the left side of the slide. It consists of a semi-circle filled with numerous vertical lines of varying heights and colors, transitioning from light green on the left to yellow and orange on the right. A small white circle is positioned at the center of the semi-circle's base.

Overview

The need for enterprises to be agile, competitive, and scalable is not a luxury but a necessity today. With cut-throat competition, democratization of emerging tech and tools, and the race for first-to-market, enterprises are compelled to rely on a tried and tested framework that can transform them into pioneers and visionaries.

DevOps is that philosophy and practice that fuels an enterprise's vision to deliver high-velocity applications and services while balancing product integrity and quality. To spear ahead of competition, organizations need to master DevOps methodologies and tools at a cultural level.

DevOps adoption has increased by 45% globally and 99% of the enterprises that have deployed DevOps have reported significant positive outcomes.

This is why UNext's bespoke DevOps programs become inevitable for your enterprise workforce to get hands-on with practices, tools, and techniques to arrive as a future-forward, future-ready business.

About UNext's Extensive DevOps Program

Conceptualized by DevOps veterans and SMEs, this program provides a deep dive into DevOps methodologies, tools, and best practices, covering everything from CI/CD automation, cloud infrastructure, containerization, security, and monitoring.

Learners gain hands-on experience in implementing DevOps pipelines, managing infrastructure as code, and deploying scalable cloud-native applications.

Our Offerings

DevOps Fundamentals

Version Control & Collaboration

CI/CD Pipelines

Configuration Management

Containerization & Orchestration

Cloud Deployment & Management

Monitoring & Logging

Security & Compliance

Performance Optimization & Scalability

Capstone Project & Real-World Scenarios

Infrastructure as Code (IaC)

Git, GitHub/GitLab, branching strategies

Jenkins, GitHub Actions, GitLab CI/CD

Terraform, CloudFormation, Puppet, Chef

Docker, Kubernetes, Helm, Service Mesh

AWS, Azure, GCP, Serverless computing

Prometheus, Cloud Monitoring Tools

DevSecOps, IAM, Secrets Management, RBAC

Load balancing, caching, auto-scaling

Kubernetes deployments

Who is the program for?

Software Developers & Engineers looking to gain expertise in CI/CD, automation, and cloud deployment

System Administrators & IT Operations Professionals transitioning to DevOps roles

Cloud Engineers & Infrastructure Specialists wanting to automate deployments and optimize cloud resources

Security Professionals interested in integrating security within DevOps (DevSecOps)

Tech Enthusiasts & Fresh Graduates looking to build a career in DevOps

Our program structure is refined and tailored for maximum impact and learning outcomes. It is also conceptualized for immediate deployment post program completion. Thanks to our pedagogy and delivery approach, learners from your enterprise will be able to:

- Understand DevOps principles and implement CI/CD pipelines using industry-standard tools
 - Automate build, test, and deployment workflows using Jenkins, GitHub Actions, GitLab CI/CD
 - Manage infrastructure as code with Terraform, CloudFormation, and Ansible
 - Deploy and orchestrate containerized applications using Docker, Kubernetes, and Helm
- Implement cloud deployments and serverless architectures using AWS, Azure, and GCP
 - Monitor applications using Prometheus, Grafana, ELK Stack, and cloud monitoring tools
 - Integrate security best practices into DevOps workflows (DevSecOps)
 - Work on a capstone project, deploying a real-world application using end-to-end DevOps automation

Why Master DevOps With UNext?

Hands-On Learning

Real-world projects, coding assignments, and case studies

Comprehensive Tool Coverage

Learn Git, Jenkins, Terraform, Docker, Kubernetes, AWS, Azure, Prometheus, and more

Capstone Project

Deploy a complete microservices-based application using DevOps best practices

Mentorship Opportunities

Expert Guidance for personalized learning support

Cloud & DevOps Integration

Master deployment strategies for AWS, Azure, and GCP

Security-First Approach

Learn DevSecOps, IAM, and security automation

Flexible Learning

Suitable for freshers, working professionals, and corporate teams

With our meticulously crafted program, you will be able to nurture DevOps practices in your workforce and foster a rapid work environment. To customize a program for your enterprise, get in touch with us today.

About UNext

UNext is India's leading online learning and talent transformation company. We provide a full stack tech platform for universities and colleges to offer online courses and degree programs. Our focus is to bring online higher education to a rising number of learners looking to level up in their careers. The online programs offered on our platform, through universities, are designed for re-skilling, up-skilling, and workforce development.

At UNext, we take pride in being one of the largest enterprise and workforce development companies in India. Our endeavor is to empower our learners, university partners and enterprise clients to achieve tangible outcomes and make a significant impact. Headquartered in Bengaluru, India, UNext Learning is part of and backed by the Manipal Education and Medical Group (MEMG).
